STATE OF MARYLAND,
DEPARTMENT OF EDUCATION,
Office of the Board of State School Commissioners,
BALTIMORE; Jan'y 15, 1872.

TO HIS EXCELLENCY,

WILLIAM PINKNEY WHYTE,

Governor of Maryland:

SIR :

I have the honor to present to you the Annual Report of the Board of State School Commissioners, for the year ending September 30, 1871, as required by law.

Very respectfully,

Your obedient servant,

M. A. NEWELL, *President.*

REPORT.

The Public School System has made a steady advance during the past year, as will be evident from the following

SUMMARY.

Average number of schools reported in 1871.....	1,390
“ “ “ “ “ 1870.....	1,360
Increase in 1871.....	30
Total number of scholars enrolled in 1871.....	80,829
“ “ “ “ “ 1870.....	77,454
Increase in 1871.....	3,375
Highest number enrolled in one term in 1871.....	64,169
“ “ “ “ “ 1870.....	62,780
Increase in 1871.....	1,389
Average number enrolled in 1871.....	57,588
“ “ “ “ 1870.....	56,315
Increase in 1871.....	1,273
Average number of scholars in daily attendance in 1871.....	36,949
“ “ “ “ “ 1870*.....	36,795
Increase in 1871.....	154
	1870. 1871.
No. of different teachers, (including Assistants,) men.....	973 967
“ “ “ “ “ women ...	691 724
Total.....	1,664 1,691
Increase in 1871.....	27
Average number of months schools were open in 1871.....	9 ² / ₁₁
“ “ “ “ “ “ 1870.....	9
Increase in 1871.....	² / ₁₁

*The number reported in 1870 was 40,151, but corrections subsequently made reduced it to 36,795.

Amount received from the State as State School Tax :

Free School fund, and Academic fund in 1871.....	\$354,644 83
“ “ “ “ “ “ 1870.....	358,040 10
Decrease in 1871.....	3,395 27
Amount received from County taxation in 1871.....	302,640 80
“ “ “ “ “ “ 1870.	262,668 09
Increase in 1871.....	39,972 71
Amount paid for Teachers' Salaries in 1871.....	510,155 06
“ “ “ “ “ “ 1870.....	473,136 23
Increase in 1871.....	37,018 83
Amount paid for building, furnishing and repairing school-houses in 1871.....	75,015 32
Amount paid for building, furnishing and repairing school-houses in 1870.....	100,646 16
Decrease in 1871.....	25,630 84
Amount paid for books and stationery 1871.....	55,719 42
“ “ “ “ “ “ 1870.....	59,384 40
Decrease in 1871.....	3,664 98
Amount paid for supervision and office expenses 1871.....	34,219 60
“ “ “ “ “ “ 1870.....	38,134 50
Decrease in 1871.....	3,914 90
Amount paid for incidental expenses of schools 1871.....	33,695 19
“ “ “ “ “ “ 1870.....	40,136 19
Decrease in 1871.....	6,441 09
Amount paid for interest in 1871.....	6,322 50
“ “ “ “ “ “ 1870.....	3,906 69
Increase in 1871.....	2,415 81
Amount paid for miscellaneous expenses 1871.....	7,373 29
“ “ “ “ “ “ 1870.....	8,124 07
Decrease in 1871.....	750 78
Amount paid to colored schools in 1871.....	4,611 40
“ “ “ “ “ “ 1870.....	4,590 31
Increase in 1871.....	21 09

The items of expenditure which show a decrease are Buildings, Repairs and Furniture, Books and Stationery, Supervision and Office Expenses, Incidentals and Miscellaneous.

Total decrease..... 40,402 59

The items of expenditure showing increase are Teachers' Salaries, Interest and Colored Schools.

Total increase.....	\$39,445 73
Showing a net decrease in the running expenses of.....	946 86
The total expenditure for school purposes in 1871 was.....	727,111 69

Combining the statistics of the city of Baltimore with those of the counties, we have the following summary :

Number of scholars in Baltimore city.....	34,854
“ “ in the counties.....	80,829
Total.....	115,683
Number of teachers in Baltimore city.....	578
“ “ in the counties.....	1,691
Total.....	2,269
Amount paid for teachers' salaries Baltimore city*.....	\$284,570 80
“ “ “ “ in the counties.....	510,155 10
Total.....	794,725 90
Amount paid for books and stationery, Baltimore city*.....	29,060 33
“ “ “ “ “ in the counties.....	55,719 42
Total.....	84,779 75
Total expenditures for Public School purposes, exclusive of buildings, in Baltimore city*.....	386,027 81
Total expenditures for Public School purposes, exclusive of buildings, in the counties.....	782,920 49

COLORED SCHOOLS IN BALTIMORE CITY.

Number of schools.....	13
“ “ scholars.....	2,048
Amount paid for teachers' salaries.....	\$18,950 50

Leaving out of account the statistics of Baltimore city, (of which the details will be found in the proper place,) the only items that seem to call for comment are the decrease in expenditures for building purposes, the increase of interest, and the very slight increase in the average attendance.

The decrease in building expenses is no evidence that the counties are now nearly all supplied with good school-

*Owing to a change made by the City Council in the date of the beginning of the fiscal year, these figures represent the expenditures, not for a year, but for the ten months ending October 31st.

houses; it merely indicates that the available funds are exhausted, and that we are putting off till to-morrow what we are not able to accomplish to-day. It would be more satisfactory if the money that is actually needed could be had regularly, year by year. Spasmodic efforts at retrenchment are necessarily followed by a reaction of increased expenditure.

The increased expenditure for interest is an unfavorable symptom. In part it is the result of bad financiering; in part it is a consequence of the circumstances in which the School Commissioners are placed, being obliged by law to keep the schools open for a certain number of months in the year, and not being able to control sufficient funds for this purpose, without the consent of the County Commissioners.

The slight apparent increase in average daily attendance shows an actual decrease for the year in proportion to the numbers enrolled. In order to keep up the same rate as last year's report shows, the increase should have been over a thousand. In Table "K," it will be seen that eight counties report a diminished daily attendance, a fact which it is hard to reconcile with a watchful, vigorous, and popular administration of the schools. We have but one suggestion to make on this head, namely: that a part, say one-half, of the salary of the teachers should be made to depend on the average daily attendance of the scholars. This recommendation has been suggested by the fact that where a fixed salary has been substituted for the "sliding scale," as it has been called, in the payment of teachers during the year, the attendance has fallen off. It is very true that the attendance often varies from causes that are entirely beyond the control of School officers; still there can be little doubt in the minds of those who have studied this subject that a vigorous, sustained, and united effort, would add ten per cent. to the daily average attendance.* This is equivalent

* "It is certain that, by a proper attention to the matter, teachers may exert a powerful influence in retaining their pupils in school."

to a saving of \$70,000; or, to speak more accurately, the result would be to give the children of the State \$70,000 worth of additional teaching without the expenditure of any additional money.

AMENDMENT OF THE SCHOOL LAW.

The annual meeting of the Association of School Commissioners of Maryland was held on the 29th of November and the two following days. Eighteen counties were represented, and a great unanimity of sentiment prevailed. The general opinion was that the present School Law, with a very few amendments and additions, could be made entirely adequate to the present wants of the people. The changes asked for are as follows:

1. A county tax of fifteen cents on the hundred dollars, at the discretion of the County Board of School Commissioners, instead of ten cents, as at present allowed.
2. The appointment of teachers to be given to the County Boards of School Commissioners, instead of the Local Boards, as at present.
3. Some further provision for the gradual education of the colored children of the State.
4. The building of a suitable house for the State Normal School.
5. The transfer of the Academic donations to the several Boards of County School Commissioners for the purpose of establishing and maintaining a High School in each county.

These several suggestions are endorsed by this Board, and are respectfully commended to the General Assembly for favorable action.

With regard to the first, an increased County School tax, it should be said that the people have hitherto responded nobly and generously to every demand that has been made on them for educational purposes. The favorable growth of popular opinion in this direction will be

manifest from the following facts. The amount raised by county taxation in 1866 (the first year of the State System) was \$80,270.43; in 1867, \$92,032.94; in 1868, not reported; in 1869, \$202,466.81; in 1870, \$262,668.09; in 1871, \$302,640.80. With the wholesome state of public sentiment which these facts develop we might rest satisfied, were it not that the necessary funds cannot always be obtained at the proper time. Not only must the School Boards have the money; they should also have it as soon as it is needed, not after debts have been incurred and all the operations of the administration have been embarrassed and thrown into confusion. There needs no argument to prove that it is cheaper to discharge our obligations as they become due, than to convert them into interest bearing debts. There needs just as little argument to show that a corps of officers will work more effectively when they are promptly paid than when their wages are allowed to run one or two quarters into arrears, or are canceled by a "certificate of indebtedness."

There need be no fear that any Board of School Commissioners will ever do anything so unpopular as ask for a larger tax than the community are willing to pay;—what they need is the authority of law to ask for as much as the schools require. The change will also put an end in great part to the unseemly struggle that often takes place between the School Commissioners and the County Commissioners, the latter assuming to know more about the necessities of the Schools than the School Board does, and undertaking to cut down their estimates. The result of this mistaken economy has sometimes been to lower the taxes one year, and increase them the next, to the great discontent of the tax-payer; and at other times to load the School Board with a debt that is embarrassing and demoralizing. There is no artifice that will succeed so well in the long run as the old fashioned economy of paying a fair price, in cash, for a fair equivalent.

2. THE APPOINTMENT OF TEACHERS.—We regard the second recommendation as one of vital importance. The

officers who build school houses and establish schools, who license teachers and prescribe their duties, who fix and pay their salaries, and receive their quarterly Reports, should certainly be able to appoint and remove teachers. It is next to impossible to secure a vigorous and uniform administration of the schools unless the teachers are held directly accountable to the County Boards. Public opinion holds the County Boards and not the District Boards responsible for the success of the Public School System. But the Law prevents the County Board from controlling the main element of success, namely, the teacher. Were every other feature of our school law perfect, this one defect might prove fatal. The following, among other reasons, may be assigned for the proposed change :

1. The County Boards through the examiner have a general knowledge of all the teachers and all the schools in the County, and can therefore make a judicious selection, adapting the teacher to the locality where he is to operate, for it is well known that even a good teacher may succeed in one School district and fail in another.
2. The appointment will be less influenced by local and personal favoritism. In a County containing one hundred schools there are three hundred District Commissioners of whom perhaps every one has a "friend" that he would like to see appointed teacher. In the same county there are but five County School Commissioners; and supposing them to have the same personal preferences, there will still be a very large proportion of schools to which appointments will be made solely from considerations of merit.
3. The teacher will be more independent of local influences and neighborhood prejudices.

EDUCATION OF COLORED CHILDREN.—The law requires that all the taxes paid for school purposes by the colored people of any county shall be set aside for maintaining schools for colored children. But this amount is so small as to be practically worthless. The Law also authorizes the several

Boards of County School Commissioners to appropriate such additional sums as they may deem proper for this purpose. But the Boards have no surplus revenue. All their funds are needed (and more are urgently demanded) for the support of the white schools. Consequently the "additional appropriations" have been very small. The following are the only amounts reported as paid to colored schools during the year: Allegany, \$200; A. Arundel, \$294.79; Baltimore, \$207.72; Calvert, \$24.72; Caroline, \$204.00; Carroll, \$162.00; Cecil, nothing; Charles, \$132.96; Dorchester, \$457.00; Frederick, \$288.75; Harford, \$58.80; Howard, nothing; Kent, \$387.48; Montgomery, nothing; Prince George's, nothing; Q. Anne's, \$715.00; St. Mary's, \$65.00; Somerset, \$86.77; Talbot, \$190.78; Washington, \$658.21; Wicomico, \$357.42; Worcester, \$120.00. Total, \$4,611.40.

This amounts to but little more than *nine cents* a head for the colored population of a school-going age.*

The State School tax is distributed to the several counties in proportion to the population *white and colored* between the ages of 5 and 20; thus all the counties receive from this source \$1.52 a year for every colored person between the specified ages, a sum which, if it could be spared, would be sufficient for the current expenses of such elementary schools as would be necessary at first.

There are no arguments in favor of the education of the people that do not apply with equal or greater force to the education of colored people, now that they are free, and are by Law entitled to the elective franchise. Every consideration of public policy, of philanthropy, and of justice demands that a beginning should be made in this direction as soon as the finances of the State will permit.

The following extract from an editorial in the Baltimore "Sun," of September 1st gives forcible expression to the sentiments of a large majority of the thinking men of Mary-

*Baltimore City is excluded from the calculation, having fully organized a system of colored schools, and having appropriated for their support during the year, \$30,000.

land on this subject: "We had supposed that the very necessity for the existence of State schools and for State legislation upon the subject of education, arose from the obligation society is under to protect itself against those inevitable consequences and attendants of ignorance—pauperism and crime. From what quarter are these evils more to be apprehended than from the intellectual debasement and destitution, if suffered to continue, of that large class of our population who, without property or means to educate themselves, dependent upon their own daily toil for their daily bread, and constituting no inconsiderable part of the productive labor of the State, have lately been admitted first to freedom and still more recently to an equality of civil and political rights. How far even society pretends to do its duty by this class let the state of things in many counties of the State answer. That there is a better appreciation of public education than formerly we are glad to admit, but we hope yet to see our people even more thoroughly aroused on this subject, and our Legislators, County Commissioners and School Boards manfully exerting themselves to do all that the State can possibly, rightfully, and fairly be called upon to do in this behalf."

4. A BUILDING FOR THE STATE NORMAL SCHOOL.—It is hoped that the call of the Commissioners' Association for a new building for the State Normal School will be promptly responded to. While St. John's and the Agricultural College make ample provision for the *free* education of young men, in spacious halls and comfortable rooms, the young ladies for whom the State has undertaken to make a similar provision, have been confined for six years to a single rented hall, and a single recitation room, both of which they must share occasionally with the male students. The school has prospered to a very remarkable extent in spite of the almost insurmountable difficulties with which it is surrounded; but it has reached its limit, with its present accommodations; and numbers of Maryland students are seeking for Normal instruction outside the State. The catalogue of one of the

seven State Normal Schools in Pennsylvania shews the names of twenty residents of Maryland.

The blind are magnificently housed, in great part at the expense of the State. The deaf and dumb will soon occupy a handsome and spacious edifice, the gift of the last Legislature. The insane have been comfortably lodged. We confidently anticipate that the liberality which has so generously provided for the blind, the deaf and dumb, and the insane, will also make provision for those who are seeking earnestly after knowledge and the best means of imparting that knowledge to our children. While we hope that all our benevolent institutions will continue to be supported by that Charity which "never faileth" it must be borne in mind that no charitable institution, however strongly it may appeal to our sympathies, is so extensive in its influence, so comprehensive in its aim, so far-reaching in its results, or so vitally connected with the best interests of the whole State, as that which instructs and trains the teachers of the young.

5. HIGH SCHOOLS.—The last suggestion made by the Association of School Commissioners looks to the establishment of one or more High Schools in every county of the State. This has been the policy of the State for the last two hundred years, never entirely lost sight of, yet never faithfully carried into effect. There is a High School in Talbot County; there are three High Schools (or rather graded schools with High School Departments) in Worcester County: the venerable and admirably conducted Academy at Charlotte Hall, though not under the supervision of the County School Boards, may be regarded as the High School of St. Mary's and Charles Counties; the Cambridge Male Academy may be looked on as a Public High School, and the Preparatory Department of St. John's College serves as a High School for Anne Arundel County. Besides these, if there are any other County High Schools either in name or reality, we have no knowledge of them.

Fifty years before the establishment of a State system of public education it was thought advisable to encourage the

growth of a better class of schools than the "poor schools" of the county by giving a small annual donation to one school in each county. This was accompanied by the condition that the Academy accepting it should give free education to one scholar for each hundred dollars of donation. These donations still exist but it can hardly be said that they fulfill the purposes originally intended. In a few counties, as we have seen, there are Academies or High Schools, but in a majority of instances the fund either goes to the support of schools no better than the District Schools, or to schools in which the public are not interested. In some counties the donation has been absorbed into the school fund;—a destination which ensures a good use of the public money, although not the use which was at first contemplated. This will be evident from the case of Howard County. The Legislature of 1868 passed an act refunding to this County the Academic donation of which it had been deprived for the preceding eight years, and ordering that this sum should be employed "for the purpose of organizing and supporting a High School in said county and *for no other purpose whatever.*"

This indicates very clearly the policy which ought to be pursued in all similar cases. There exists an urgent need for a school in every county intermediate in rank between the District Schools and the Colleges. Such schools would be not only nurseries for the colleges, but seminaries and training schools for teachers. A single well conducted school in each county where the best principles of school teaching should be exemplified in practice, where scholars should be prepared for the Colleges or the State Normal School, and where District School teachers could resort occasionally to make observations and pick up useful hints, would exert an indirect but powerful influence on every school in the county.

COLLEGES.

The Reports from the several Colleges, of which an abstract will be found in table "L," indicate that they con-

tinue to deserve and receive the patronage of the public. St. John's, and the Agricultural College, owing to the large preponderance of students on State scholarships, may almost be considered as free Colleges. Certainly no young man properly qualified has been refused admission or is likely to be refused. The continuance of State support to these Institutions is claimed not as a boon to higher education (although a withdrawal of that support would compel them to close) but distinctly on the ground that it is necessary for the solution of the problem of primary education. Collegiate education for all who have time and means to avail themselves of it, under the auspices and at the expense of the State, is the surest guarantee of ample facilities for the elementary education of every child within our borders. We are proud of the position that our State holds to-day on this question of Free Schools and Free Colleges. Let it be henceforth and forever the glory of Maryland that the opportunities of education are, so far as the State can order it, equally free to high and low, to rich and poor—that there is for all her sons a continuous highway (uncrossed by a toll-gate) from the lowly district school to the highest Collegiate honors.

STATE NORMAL SCHOOL.

The State Normal School has kept up its numbers and its reputation during the year. The whole number of enrolled students was 163, of whom 51 came from Baltimore city; and the remainder as follows: from the county of Alleghany, 4; Anne Arundel 9; Baltimore, 36; Calvert, 2; Caroline, 1; Carroll, 1; Cecil, 2; Charles, 1; Dorchester, 5; Frederick, 3; Harford, 6; Howard, 6; Kent, 3; Montgomery, 2; Prince George's, 2; Queen Anne's, 8; Somerset, 6; St. Mary's, none; Talbot, 1; Washington, 2; Wicomico, none; Worcester, 7; from Pennsylvania, 2; Virginia, 2; Florida, 1. Of these 11 graduated in May and are now teaching with great success; forty-one are teaching under certificates; forty-nine returned to school to pursue their studies; the

remainder have disappeared. The number of graduates and under graduates at present teaching in the State is not less than 200.

The great want of the school is a suitable building. The attempt to instruct one hundred young ladies and twenty young men (the average daily attendance) in a single study room and a single recitation room, is one which few teachers would make, and in which still fewer would succeed. Yet within these narrow limits, and with a school divided into four sections, the attempt is made to give instructions in Reading, Spelling, Writing, Arithmetic, Geography, History, Grammar, Algebra, Geometry, Physical and Natural Science, Book-Keeping, Drawing, Music, Latin, French and German. The ingenuity, energy, skill and patience of the teachers under peculiar difficulties and discouragements deserve the praise that has been so freely accorded to them at home and abroad. They will achieve "anything but impossibilities," but continued success under the circumstances is an impossibility.

Two Model Schools, one for Boys and the other for Girls, are connected with the Normal School; they are to the students what the practice ship is to the Cadets at the Naval Academy; but their influence is seriously impaired by the necessity of holding them in separate houses, one of them more than half a mile from the Normal School.

INSTITUTION FOR THE DEAF AND DUMB.

The Institution for the Deaf and Dumb at Frederick is doing an important and noble work giving instruction and culture to eighty-seven deaf mutes, the most of whom would otherwise be deprived of even the rudiments of education. The methods of instruction pursued are in advance of those prevalent in many schools which labor under no such disadvantages. The reason of this superiority of method is obvious; every body thinks he can teach a district school and any body can get a district school to teach, but no body

dreams of setting up as a teacher of deaf mutes until he has learned how to teach them. The school is divided into six classes, properly graded, each under the charge of a separate teacher who gives instruction in all of the branches of study pursued by the class. There is a seventh teacher who teaches articulation and lip reading to about twenty-five pupils selected from the regular classes. All instruction in the various branches of study is given in the sign language. The studies pursued are Arithmetic, Geography, History, Grammar, Composition, Natural Philosophy, Chemistry, and Drawing. Pupils of average ability are not able to use the ordinary text books for the first three years. Their studies are therefore chiefly confined to language, drawing and arithmetic without the help of the book. It is proposed to extend the course so as to include the Higher Mathematics, Book-Keeping and Languages for such as wish and can afford a more complete education.

MARYLAND INSTITUTION FOR THE INSTRUCTION OF THE BLIND.

This Institution is designed for the education of the blind in those branches of literature and the mechanic arts for which they have capacity. Blind persons of good moral character between the ages of 9 and 18 are admitted on the payment of three hundred dollars per annum, which pays all expenses except clothing. If the parents cannot pay that amount the child may be educated in the Institution at the expense of the State by consent of the Governor. The entire number of pupils under instruction for the year ending December 1, 1869, (the date of the latest accessible information) was fifty-four, all being free pupils except two.

MANUAL LABOR SCHOOL.

The Manual Labor School has now been established for twenty-eight years. It is situated between the Washington and Frederick turnpikes and has attached to it a farm of one hundred and forty acres. It is supported by annual subscriptions from regular patrons of the Institution aided

by State and City appropriations. There were in attendance during the past year sixty boys from eight to nineteen years of age, most of them orphans. The annual cost per capita is about one hundred and five dollars. When the pupils have received a respectable rudimentary education they are apprenticed either to farmers or mechanics within the State of Maryland.

HOUSE OF REFUGE.

The House of Refuge is at once a benevolent, a reformatory, and an educational institution. It gives employment and instruction to three hundred and ten boys and sixteen girls, most of whom but for this "Refuge" would have been either outcasts or criminals. If the power of education over a human soul could be doubted, the study of this institution would be sufficient to carry conviction to the most skeptical. A large number of those who enter the "House" with characters not above suspicion, become, when they have left it, useful, trusted, and honored members of society. It is to be hoped that the movement now on foot for the establishment of a similar "Refuge" for colored youth will meet with that success which well directed benevolence deserves.

HOWARD NORMAL SCHOOL.

In any systematic effort that may be made for the general education of the colored population the Howard Normal School must play an important part. Owing to circumstances on which we need not dwell, it seems necessary that the teachers of the colored people in the rural districts of Maryland should be of the same race. In many places the presence of a white teacher among colored people would create a prejudice which, however unreasonable, it is not desirable to provoke, because it would interfere with the success of the schools. It is therefore fortunate that an institution like this, capable of training colored people for service as teachers, is in existence, fully organized and equipped.

The Howard Normal School occupies a spacious and comfortable building at the corner of Courtland and Saratoga streets. The number of pupils in attendance December, 1871, was 209, each of whom pays from ten to fifteen dollars per year for tuition. The school is arranged in three departments—Normal, Grammar and Model under the care of the Principal and three assistant teachers. A Library of more than a thousand volumes is attached to the school and is much used by the pupils. The school is mainly supported by private subscription, the fees received from the pupils being quite inadequate to sustain it.

TEACHERS' INSTITUTE, &C.

The Principal of the State Normal School has held during the year a Teachers' Institute in the following counties; Allegany, Washington, Frederick, Carroll, Harford, Howard, Calvert, Talbot and Wicomico, all well attended except in Calvert. He hopes during the present year to receive an invitation to visit, for the same purpose, the counties where no Institution has yet been held, Prince George's, St. Mary's, Cecil and Caroline, and also Montgomery, where he has not been since 1868. He has attended four meetings of the State Board, four meetings of the Board of Trustees of the Agricultural College, and four meetings of the Teachers' Association of Baltimore county. He attended during August, when the schools are closed, the meeting of the National Association of Teachers in St. Louis, and the State Association which met in Baltimore. He has, as opportunity offered, visited many schools in Baltimore county and the counties adjoining. His office has been open ten hours a day, on an average, to those who call on school business. He has been the medium of communication between Teachers who want employment and Commissioners who wanted Teachers. His business correspondence for the year amounts to nearly two thousand letters and circulars. The preparation of the Annual Report is full

occupation for one month in the year. In addition to the above he gives an average of four lessons a day in the Normal and Model Schools, and during the winter has two evening classes meeting once a week. He has not been able to visit the High Schools, since the date of the last Report, as required by Law, but hopes to attend to that duty early in 1872.

COUNTY REPORTS.

The County Reports (with two exceptions) were received at an earlier date than in any previous year. Some of them are models of neat and accurate work; a few are neither neat nor accurate. While most of the County Examiners respond promptly to all the demands made upon them, the difficulty of obtaining exact information on any subject from *all* the counties is very great; and when any one county fails to report the State account is incomplete. One of the most important items in school statistics is the average number of pupils in daily attendance. This item has been called for, for four successive years, and this year it has been given by every county but one; but the failure of this one renders the total inexact. If an officer can fail, year after year, in the performance of duty expressly required by law, a very important and not very difficulty duty, and still retain his position, it must be presumed that he has extraordinary abilities in some other direction which make up for this deficiency.

It will be seen by referring to the various County Reports that several of the Examiners have failed to visit their schools as often as the law requires. Frequent, searching, and regular supervision is the right arm of a public school system, without it we may have a few good schools but we cannot expect to have a well established system. No man in private business would expect to succeed if he had 50 or 100 employees and neglected to inspect their work closely and regularly; and the conditions of success in public business are just the same as in private life. The schools should be

inspected, if it were possible, once a term, and it would be a very short sighted economy that would be content with less supervision than this for the sake of saving the small additional expense.

The counties of Allegany and Baltimore have published their Reports in pamphlet form for home circulation. The example is worthy of imitation. Let the people have all the light possible on this subject.

The Annual Report does not readily get into circulation, especially in those years when it is sent to the members of a Legislature that has ceased to exist. It is recommended that one half the number of copies printed be distributed to the several School Boards in proportion to the number of schools under the jurisdiction of each. In this way there would be a better chance of their getting into the hands of those who would read them.

TABLES.

Table "A" shews the population of the State according to the Census of 1870 as reported by the Comptroller to the State Board.

Table "B" shews the quarterly distribution of the State School Tax to the several counties and city of Baltimore.

Table "C" shews the distribution of the several Funds constituting the Free School Fund.

Table "D" shews the amounts received from the State by the several counties and the city of Baltimore as State School Tax, Free School Fund, and Academic Fund.

Table "E" shews the amount raised by local taxation for Public School purposes in the several counties.

Table "F" shews the highest number of pupils enrolled in one Term; the quota per capita of State money; the quota of county money; and the annual cost of educating each enrolled scholar.

Table "G" shews the items and aggregates of receipts from all sources.

Table "H" shews the expenditures in the several counties for teachers' salaries, incidental expenses of schools, building, furniture and repairs, supervision and office expenses, books and stationery, old debts, interest, colored schools, and "miscellaneous expenses."

Table "I" shews the average number of scholars studying the several branches.

Table "K" shews the number of schools, teachers male and female, and different pupils; the average number enrolled and the number in average daily attendance.

Table "L" shews the statistics of the several Colleges and of the State Normal School.

Table "M" shews the statistics of the High Schools and Academies.

(Signed)

M. A. NEWELL,

President.

GEO. H. CARMAN,

WM. J. AYDELOTT,

THOS. A. CARRICO,

JNO. W. PAGE,

Secretary.

Excess of receipts over expenditures.....	2,237 65

ALLEGANY COUNTY.

G. G. McKAY, *Secretary, &c.*

ANDREW GONDER, *President.*

M. A. NEWELL, *President:*

DEAR SIR: We commenced this scholastic year with a debt of three thousand one hundred and sixty-two dollars and forty-five cents, (\$3,162.45,) incurred the previous year for teachers' salaries, etc., which is now paid. We have also paid for teachers' salaries during the present year forty-one thousand, four hundred and nineteen dollars and fifty cents, (\$41,419.50;) incidental expenses, three thousand six hundred and twenty-seven dollars and sixty-five cents, (\$3,627.65;) books and stationery, nine thousand four hundred and eighty-six dollars and twenty-three cents, (\$9,486.23;) school buildings, seven thousand four hundred and sixty-nine dollars and seventy-one cents, and school furniture seven hundred and eighteen dollars and eleven cents, (\$718.11.) The debt for which the Board have given their obligation (consequently drawing interest) amounts to \$8,500. The value of school buildings and furniture, at a moderate estimate, amounts to \$56,000.

It is unnecessary now to urge the benefits to be derived from our Public School system. We will, however, take this opportunity of stating a few important facts concerning the evils to be avoided, if we wish to reap all the good intended by the Public Schools.

The inefficiency of many holding positions in our schools by virtue of term certificates, granted by petition of District School Commissioners and patrons, is notorious. The argument that "he or she," no difference how low the grade of acquirements may be, "is good enough for *our* school," is a great fallacy. "A bad school-master," says Guizot, "is a scourge to a community." Teachers who add nothing to

the intelligence and moral power of the county, waste its resources. Poor teachers not only fail to attract to their schools great numbers of those who really desire to learn, but equally fail to instruct those whom they pretend to teach in the most simple duties of life. In such we behold the sad spectacle "of ignorance engaged in the stupendous fraud of self-perpetuation at the public expense."

The most potent remedy, we believe, for these gigantic evils, is to elevate the profession by giving liberal salaries to qualified teachers. In sparsely settled districts, where schools are small, and the pay of teachers consequently at the minimum, there is also a remedy, an instance of which we give below.

We earnestly entreat every parent to visit occasionally the District School, that being decidedly effective in advancing the best interests of their children, by showing to the teacher that the parents are interested, and are taking note of the progress of the pupils.

Normal instruction has been brought within the reach of all who desire it in this county: the good effects were manifested in the schools of those who availed themselves of it. The teachers' institutes were productive of much good, and were successful in inspiring new energy into those who attended for the purpose of enlarging their knowledge in the great work.

The Wilson's School District, near Altamont, is sparsely settled, consequently unable to procure a first grade teacher on account of the minimum salary. Mr. J. Wilson proposed to the Examiner the preceding winter, that if he would procure a good teacher for the next school year, he would pay all expenses of board himself. Communication was had with Professor Newell, who procured a teacher upon the condition that the engagement should extend ten months. Mr. Wilson at once endorsed the terms. What has been the result? The Wilson School became the banner District School of the county.

Respectfully,

GEO. J. McKAY, *Examiner.*

ANNE ARUNDEL COUNTY.

ELISHA C. TAYLOR, *President.*

WM. H. PURVEIL, *Secretary.*

PROF. M. A. NEWELL, *President:*

DEAR SIR: I have the honor of reporting the statistics and financial condition of the Public Schools of Anne Arundel county for the year 1871.

The present Board of School Commissioners, viz: Messrs. Elisha C. Taylor, Samuel H. Dorsett, M. Bannon, Addison Johnson, W. L. Harman, Daniel T. Hyde and Joseph W. Wood, have, by their interest and zeal in advancing the cause of education, and the economy used in the administration of their trust, furnished proof of their ability and devotedness to the best interests of our Public Schools; which under their efficient management have continued to increase in favor with the people.

The Public School system of Maryland, affording, as it does to all, the privilege of acquiring a sufficient amount of knowledge to fit them for useful and intelligent citizens, must commend itself to every one who has intelligence enough to estimate its value.

In compliance with the expressed wishes of both patrons and teachers, the School Board have changed the time of vacation from August and September to July and August. In consequence of this change, the scholastic year ended the 30th of June, making but nine months from the first of October; but the vacation was not increased by this change, as the month of September was substituted for July.

Our Teachers have generally faithfully discharged their duties, and are deserving of greater remuneration than they obtain. The schools under their charge give evidence of much improvement.

I have endeavored to impress upon their minds the importance of study in order to increase their usefulness as instructors, and I have the satisfaction of knowing that many have profited by the advice, and have qualified themselves sufficiently to obtain First Grade Certificates.

The County Commissioners have levied twenty cents on the one hundred dollars for Public Schools for the year 1871.

Our County owes a debt of gratitude to the First National Bank, of Annapolis, for their commendable liberality in furnishing means for the continuance and efficiency of our Public Schools.

We are happy to inform you that the reputation of the Normal School, intended "for the instruction and practice of teachers in the science of education, the art of teaching and mode of governing schools," is yearly gaining favor. The demand for Normal School graduates exceeds the supply. As the efficiency of an army depends upon the discipline and drill of its soldiers, so the efficiency of a school depends upon the discipline and drill of its scholars.

The training received at the Normal School, under your skillful and able management, enables its graduates to enter intelligently and successfully upon the discharge of their duties, and hence the *good order* and *discipline of their schools*: two essential requisites, without which no teacher can profitably impart instruction.

WM. H. PURVEIL, *Secretary, etc.*

BALTIMORE COUNTY.

GEO. H. CARMAN, *President*. DR. SAMUEL KEPLER, *Examiner*.

PROF. M. A. NEWELL,

President Board of State School Commissioners:

The Report of the Public Schools of Baltimore county for the year 1871 is respectfully submitted.

The accompanying tables are accurate and complete.

During the past year there were in operation 111 schools, which were kept open ten months.

The total cost of the schools for the year was \$88,176.06; of which amount \$64,558.89 were for teachers' salaries, \$54,194.78 being for principals, and \$10,364.11 for assistants. These amounts give an average of \$488.24 paid the former and \$252.78 the latter. For incidental expenses of schools \$4,890.20 were expended, being \$576.22 less than for the previous year.

The cost of books and stationery was \$8,599.53 which is \$2,080.52 less than the cost of the same for 1870. There has been no change in the book list.

There were employed in the schools 57 male and 54 female principals, and 5 male and 36 female assistants; making a total of 152 teachers for the whole year.

The largest number of pupils enrolled was 6,015 during the winter term; while for the same term the previous year there were 5,856. The different pupils numbered

8,420 and the average number enrolled for the year was 5,460, 3,102 males and 2,358 females. The average daily attendance was 3,754.

The average cost of each school for teachers' salaries, incidental expenses, and books and stationery was \$703.14, and the average cost of each pupil was \$14.29.

For repairs and furniture there was expended \$3,091.11, which, added to the estimated value of school property as exhibited in last year's report, makes the present value of said property \$72,192.96.

The total receipts for the year, from all sources, amounted to \$94,961.60. From the county tax there has been received the sum of \$38,530.91. A balance of \$1,835.14 remains due on the levy of 1868, \$2,371.74 on that of 1869, and \$8,373.05 on that of 1870.

A decrease exists in the amount of book fees as compared with the receipts from that source for the past three or four years. To our board the exaction of a moderate fee (75 cents per term) for the use of books has always seemed the most satisfactory manner of defraying the cost thereof, and, at the same time, of insuring to every scholar the possession of the necessary text-books. The citizens of our county are accustomed to this plan for supplying pupils with books, and, as a general thing, the book fee is cheerfully paid. Like every other system, however, good judgment must be exercised in the management of it; and as the power to exempt from the payment of this fee is possessed by the District School Commissioners it is highly important that they should be careful in the exercise of it, in order that the receipts from this source may not diminish to any extent.

The county tax for the support of the public schools for 1871, is twelve cents in the hundred dollars. Before the levy was made for the current year, by the County Commissioners, the Board of School Commissioners appointed a committee to wait upon them, and ask for a levy of fourteen cents in the hundred dollars. As the tax for

the previous year had been fixed at ten cents by the County Commissioners, when our Board had fully explained to them that it would be insufficient, and had requested twelve, it was considered necessary to demand fourteen cents for 1871 (making an average of twelve cents for 1870 and 1871) in order to conduct the schools, and do such building and repairing as might be required during the year. The County Commissioners refused to grant this request of our Board, and instead of fourteen a levy of twelve cents was made for school purposes. With ten cents in the hundred dollars for a portion of the year, and twelve cents the balance, the result has been such as was anticipated in last year's report—no school houses have been built during the year, and only such repairing and furnishing has been done as was absolutely necessary. During the year many petitions for the erection of school houses were presented to the Board, but in no instance did they feel justified in running the risk of financial embarrassment that would result from building school houses while the receipts were only sufficient to support the schools already in operation. In order, however, to meet the demand that existed for schools in certain sections of the county, the Board, at a meeting in the early part of last September, established seven new schools, it being understood that the different neighborhoods in which they are located should obtain houses and furnish them, and the Board be at no additional expense beyond paying for teachers' salaries, books and stationery, and incidental expenses. Hence, at the present time we have one hundred and eighteen schools in the county, the further history of seven of which belongs to next year's report. As a further result of an insufficient levy, the Board, during the year, was compelled to borrow to a considerable extent, for short periods, in order to meet the current expenses at the end of the different terms. As interest had to be paid on the sums borrowed, it has resulted that this item is much greater in amount than heretofore.

The non-attendance of children who ought to be going to school, and the irregular attendance of pupils, are subjects demanding serious consideration. Baltimore county, however, is by no means singular in being the seat of these evils. They exist in every county in the State, and in every State in the Union. Indeed from the location of our county with regard to Baltimore city, and the existence in our midst of a large number of private schools, better reasons could be advanced for the attendance not being greater than it is in our schools, than could be given by any other county in the State. Still the fact exists that our schools do not contain all the children who ought to be receiving an education. During the scholastic year just closed the number of children who ought to have attended school (that is the average number enrolled for the year) was 5,460 while only 3,754 were in daily attendance, being a difference of 1,706, nearly one third. The statistics of the schools also show the number of different pupils enrolled for the year to be 8,420. Allowing 1,000 for the same pupils enrolled in different schools, it is still apparent that there ought to be, in Baltimore county, over 7,000 pupils attending school every day in the year. While this evil is patent, and is greatly to be deplored, it is not an easy matter to discover an unobjectionable plan for its removal. Compulsory attendance has been tried in some sections and has proved a failure. Granting that the law does not seem able to provide a remedy, it is in the power of teachers to accomplish much in effecting a reform in this particular. Let them endeavor to awaken the parents' interest in the education of their children, let them make the school room attractive and inviting; let them prove by "their works," to patrons and others, that the pupils in their charge *will be educated* if they attend school;—let them exhibit renewed energy and diligence in these respects and good results will undoubtedly follow.

We have had a Teachers' Association in Baltimore county for a period of ten years. The meetings occur on the Friday

and Saturday immediately succeeding the quarterly meetings of the Board. The Board, having given the teachers permission to close their schools on the Fridays on which the Association meets, has thereby given evidence of its appreciation of these meetings. Within the past few years the Association has displayed increased vitality, for which, in part, it is indebted to the practical instruction imparted by the Principal of the State Normal School at almost every session during the last three years. The proceedings are varied by essays and discussions, and vocal and instrumental music, by the teachers, and addresses by gentlemen of experience and ability as educators. The meetings are well attended by the teachers, the majority taking a decided interest in them, but few being willing to forego the advantages to be derived from them; as it is evident that every teacher who desires to advance in his profession can be greatly assisted by becoming a working member of the Teachers' Association.

It is proposed, during the present year, to establish District Associations, by the teachers of two or more contiguous Districts meeting together every month. This is a commendable movement on the part of those teachers engaging in it, the result of which will not only be productive of mutual improvement, but will also cause the participants therein to take increased interest in the County Association.

SAMUEL KEPLER,

Examiner, &c.

CAROLINE COUNTY.

COL. JAS. E. DOUGLASS, *President.*REV. GEO. F. BEAVEN, *Sec'y.*

PROF. M. A. NEWELL:

Dear Sir:—In presenting you the tabular statement of the condition of our schools and an account of our financial operations for the last scholastic year, with the accompaniment of a few remarks, I am able to say that we have reason to be pleased, on the whole, with the work that has been done as not being without gratifying fruit, and hopefulness for the future. Still, as yet, the want of funds precludes the accomplishment of much which would, doubtless, greatly advance the success of education among us. Poverty is the frustration of our long cherished desire to have more new and better school-houses supplied with proper furniture, and to afford a more generous compensation for the arduous services of our teachers. Unquestionably, good houses, with convenient and comely furniture, and more liberal salaries to teachers, tend to educate the children æsthetically, and to rouse the energies, and to secure the faithfulness of the teacher. Where more is given, greater must be the sense of responsibility.

No new houses were erected during the year. The Board has ordered the building of two, one at Ridgely, and the other at Marydell. They expect to do larger repairs the ensuing year, which many houses sadly need.

The county levy asked for was \$8,000—the amount granted, \$6,000—collected, \$5,335.44.

There has been no change in the text-books, the principal of which are, Davies' Algebra, Wells' Nat. Philosophy,

Payson, Dunton & Scribner's System of Book-Keeping, Smith's English Grammar, Ray's Arithmetic, Cornell's Geographies and McGuffey's Readers.

The Board take great pleasure in reporting themselves out of debt, there being no liabilities, but a resource in the balance of the county levy due of \$663.76. The County Commissioners have made a more generous levy for the ensuing year, giving us \$10,000; \$2,000 of this amount will be expended in building and repairs.

We have had no Teachers' Institutes, nor Associations. An effort, however, was made to induce our teachers to unite with those of Talbot county, in an Institute which you held in Easton last July. Very few attended. But, I doubt not, that such contrivances to improve and further education, and to increase the efficiency of teachers will eventually be a success among us.

Truly and respectfully yours,

JAMES E. DOUGLASS,

Prest. of the Board.

CARROLL COUNTY.

W. P. ANDERSON, *President.*

J. M. NEWSON, *Secretary, &c.*

PROF. M. A. NEWELL,

President Board State School Commissioners.

DEAR SIR: In presenting to you the accompanying tables, exhibiting the operation of the Public Schools of Carroll county, we desire to make a few brief explanatory remarks. As will be seen, by reference to the tables, the school year embraces the Fall term of 1870, and the Winter, Spring, and a partial Summer term, ending on the 30th of June, 1871, while the financial year closes on the 30th of September, 1871.

The tables will show that we had ONE HUNDRED AND SIX schools open during THREE terms, and THIRTY-FIVE schools open during the Summer term, the latter being under a special arrangement with the teachers, to whom, upon stipulated conditions, a specified proportion of the book-fees, collected by them during the year, was allowed as their compensation for the Summer term.

In 1850, and at different periods since, Carroll county, having a County School Fund, loaned a part of it to individuals, and invested other parts in bonds, &c. Since 1868, the School Commissioners have collected and invested about \$33,000 of the principal of this fund in building and repairing school houses, and in supplying them with furniture, stoves, &c. About forty new school houses have

been built, many old ones have been repaired and supplied with book-cases, and nearly all have been furnished with new desks of the Soper patent. At the very lowest fair estimate the school property, thus acquired in locations convenient to almost every section, is worth nearly, if not quite, double its cost to the county; and it appears to be a much better investment than to have the fund loaned out to individuals, subject to the danger of occasional losses through insolvencies and legal technicalities. To prevent such losses, and to invest the fund in real property, owned by the Board, so that it may do the most service to the children of the county, the School Commissioners have ordered the collection of all money due to the Board on judgments, &c., so that it may be invested in school houses and other needful improvements.

Our first COUNTY TEACHERS' INSTITUTE, held in July, and presided over by yourself, though attended by few more than half of the teachers of Carroll, made a very favorable impression. Immediately after the close of the Institute a highly promising COUNTY TEACHERS' ASSOCIATION was organized, and measures were adopted to form Local Associations in every election district in the county. At this period the County Institute and these Associations, in which the teachers manifested much interest, promised the most favorable results; but, unfortunately, at the next meeting of the School Board the condition of the treasury, for which the County Commissioners had failed to provide, (as they had been repeatedly urged to do,) rendered it apparent that either the number of school terms would have to be less than the law requires, or the teachers' salaries would have to be reduced; and the Board chose the latter alternative, reducing the salary of a *first* grade teacher to \$80, and that of a *second* grade to \$75 per term. This reduction of salaries exerted an influence so depressing that some of our teachers left the county, and others, turning their attention from their Institute and Teachers' Associations, began to look to other vocations to procure the means of support for themselves and families.

We regret to have to say that, although the standard of qualification on the part of teachers has been in some degree elevated, and that those of our schools whose District Boards have taken care to provide *live* and zealous teachers, have made commendable progress,—yet we cannot say, with much confidence, that our schools, in general, have improved in proportion to the hopes we cherished at the close of last year. While we have a number of schools that will favorably compare with the best of like grades that can be met anywhere, we very much fear that quite as many have retrograded under depressing influences which the Board of School Commissioners and the school officers generally have done all in their power to avoid. One would scarcely suppose that so small a matter as the distribution of books would be sufficient to cause so much dissatisfaction; but, in our judgment, the prejudices of the people unfortunately excited in resistance to the action of the Board on the troublesome question of supplying books, (adopted, doubtless, with the very best intention and in the right direction,) exerted a very depressing influence in much the largest portion of the county. In many places this prejudice was carried so far that public meetings in school houses were called and *strong* resolutions adopted in direct opposition to the action of the Board.

How can schools prosper as they should do, when the School Commissioners zealously work in one direction, and the people, bitterly denouncing the Board, vigorously work in the opposite direction, or refuse, as many did, to permit their children to attend the public schools at all?

In some parts of the county the people applauded and sustained the action of the Board; in other parts many indulged in denunciations of the School Commissioners, withholding all co-operation; and the Board could, therefore, move neither in one way nor the other without encountering hostile prejudices, which had a ruinous effect upon the schools.

This shows how important it is that the law should be amended so as to provide for a uniformity of text-books and a prescribed system of supplying them to the schools applicable to all alike; and then, if the School Commissioners will faithfully execute the law, (as it will be their pleasure to do,) the people will have no excuse to excite prejudices against their school officers; and all who are willing to submit to a plainly expressed law (and few are inclined to resist law,) will cheerfully co-operate; and when we shall have secured a cheerful co-operation between the people and the School Board, the schools will soon become all that can reasonably be expected.

Perhaps, sir, we will be thought obtrusive in pressing these suggestions; but an amendment of the law to the effect indicated appears to the writer to be absolutely necessary; and, therefore, we cannot resist the inclination to urge it.

About the time of the passage of the order on the book question, which gave so much dissatisfaction to a portion of the people, the book committee, for very good reasons, doubtless, recommended a change in an important part of our text-books, which recommendation was adopted by the Board; and, as many parents had purchased a supply of books for their children under the former arrangements, which permitted the sale of books, the change which required the pupils either to pay the book-fee or purchase a new supply from booksellers at higher rates, had a tendency to increase the dissatisfaction and depress the schools.

But our chief difficulty, out of which most of the others grew, was the reduced condition of the treasury. In 1868 no county levy was made; in 1869 a levy of ten cents on the value of \$100 was assessed, and a like sum for each of the years, 1870-71; but of all the county levies up to September 30th, 1871, the whole gross sum paid to the School Board by the County Commissioners amounted to only \$26,980.14, making an average payment for each of the four years of only \$6,745.03½ a year, which is much less than half of what

was necessary to add to the receipts from the State treasury, to defray the expense of 106 schools. The treasury having become exhausted, because it was never properly supplied it became necessary to contract debts to procure the means of paying the Teacher; and this debt, still existing, drove the Board to efforts for retrenchment; and this retrenchment, affecting only the already inadequate salaries of the teachers because there was little else to which it could be applied, has greatly crippled the energies of all; and it will, doubtless, for a short time in the future, seriously depress the animation and progress of the schools.

Although we have reason to commend the zeal and the efforts of some of the teachers of Carroll, to qualify themselves for the great work before them, yet we are fully persuaded that we must ultimately look to the noble work now being so well done in the State Normal School, for an ever increasing supply of zealous, spirited, competent, trained teachers for the public schools of our good old State of Maryland. We have had much less intercourse with the Normal School than we have desired; but what little we have had the pleasure of seeing, assures us that zealous graduates of the Normal School, employed as teachers, will prove a blessing to all who may be so fortunate as to secure their valuable services.

In Carroll county there are two African Schools, which receive aid from the School Board; but, as they make no reports the appropriations to them, are placed among the incidental expenses of the election districts in which they are embraced, as are other items of incidental expenses paid to School Commissioners, but not entered on the teachers' reports. This accounts for the discrepancy which appears by comparing the column of incidental expenses in the table with the sum as it appears on the teachers' reports.

In addition to the Public Schools, Carroll county is well supplied with Colleges, Academies, Denominational Schools and a variety of private enterprises, all, it is believed, worthy of liberal patronage; so that every youth in Carroll,

of whatever condition, has ample opportunity to acquire an education suited to his capacity and aspirations.

Notwithstanding what has been remarked in reference to depressing influences, we are by no means discouraged. So soon as our financial embarrassments shall have been removed, and we feel confident that they will be removed in the most liberal manner early in the ensuing year, we have good reasons to believe that School Commissioners, teachers, parents, pupils, and all will renew the work with awakened energy; and, profiting by possible errors of the past on all sides, they will cheerfully co-operate in every proper measure; and if this should be done, (which we should not for a moment doubt,) the Public Schools of Carroll will soon approximate perfection. We have the means, the spirit, the will, and if not the *talent*, we can soon develop it; for we have here as good material as the world affords.

All, therefore, that we need to enable us to secure a system of Public Schools in Carroll, equal to any in the world, are a faithful execution of the present law amended as true wisdom will suggest, a financial policy adequate to the purpose, and a cordial co-operation of all the people with a prudent Board of County School Commissioners; and all these we hope and expect to have before the close of the ensuing year.

J. M. NEWSON, *Secretary, etc.*

CECIL COUNTY.

DR. R. C. MACKALL, *President.*

REV. JOHN SQUIER, *Examiner.*

In reporting the condition of the schools under their care, the Board of School Commissioners would say, that they have kept in operation during the full period of ten months. This has been done, however, with the same financial embarrassment as formerly; yet, we are happy to say, with some slight diminution of the debt of last year. The Board have, as will be seen in the financial statement, expended a large amount for new school houses. These payments were for houses built last year.

There are under the care of the Board seven schools for colored children; these schools are in vigorous operation, and from personal inspection give gratifying evidence of being taught by competent teachers; and of accomplishing their work well. As the tax appointed by law for the support of these schools, is utterly inadequate for the purpose of keeping them open, the Board have determined to place them on the same base as the other schools; the policy being to establish good schools, though few in number, rather than many imperfect in their character.

In addition to what we have said in the two preceding reports, we would freely state our opinion, that the reduction of the number of School Commissioners from nine to three, will be an injury to the system. It is true, the business of the Board at their quarterly meetings might be efficiently done by three; but the inspection of the schools,

the personal acquaintance with their wants, the thorough and practical knowledge of their condition, cannot be so complete with three Commissioners as nine. Nine may appear more cumbrous at the centre, but one for each election district, we think, would be far better on the field among the schools; and we hope the Legislature will return to the former plan, that has done so well in this county, and under which the schools have attained a good degree of success.

In conclusion, we are pleased to say, that the schools in this county are in good working condition. The number of teachers seeking to elevate their profession, as well as their personal qualifications, are increasing, and in all parts of this work, we are looking hopefully forward to a still higher degree of success.

R. C. MACKALL, *President.*

CHARLES COUNTY.

PROF. M. A. NEWELL,

Dear Sir :—In presenting, as required by law, a statistical report of schools of this county, for the year ending September 30, 1871, a few observations in connection therewith may not be inappropriate.

During the past summer an offer was made to our School Board to give McGuffey's New Readers in even exchange for all readers, old and new, grade for grade, in use in our schools. This proposition appeared so favorable, that our Board accepted it, the exchange was effected, and each party is in receipt of the books agreed upon. Our mode of distributing books to the different schools is principally through the hands of the teachers, who procure from us the number and kind they may need, supply the pupils, and look for pay to the parent whose child is so supplied. The amount of the teachers' bill is deducted from his quarter's salary upon return of his quarterly report. Occasionally, however, books are sold directly to those who may call for them. Books are given to the indigent upon certificate of Trustees, that such pupils are unable to purchase them, the charge on this account is however very small. It gives us great pleasure to bear unequivocal testimony to the good resulting from our Institute of December last, accompanied only with the regret that we do not, and cannot, have meetings of the kind more frequently. We have done more towards rebuilding, repairing and furnishing school houses during this scholastic year than heretofore, since our connection with the schools of the county, and yet there is much more to do if we had the necessary means.

It will be seen that, with one exception, the accompanying statistics are complete, and by reference thereto the general condition and operations of our schools, as compared

with preceding years, may be ascertained. A concise statement, however, upon several points, may assist the general reader and facilitate the work of comparing and examining the statistics, and may also, probably, present to view facts which might otherwise pass unnoticed in dry statistics, however accurate they may be. As regards the number of pupils on roll during each school term, the average attendance, the number of different pupils, and the number studying each branch, our schools have about held their own. The average attendance of those on roll during the four school terms, is about fifty per cent., the average attendance of the different pupils attending school is about thirty-seven per cent. In other words, of the 1156 pupils who have attended school at some time or other during the year, about one-third of them on an average attend school. Of the whole number (1156) that have thus attended, about seventy-five per cent. study spelling, sixty-four reading, fifty-six writing, fifty-two arithmetic, thirty-five geography, twenty-three grammar, and seven per cent. history. The per cent. of average attendance would be still less if we were to assume for our school-going population the basis upon which the State School Tax is apportioned among the different counties of the State. In this county, the population between the ages of five and twenty years, is a little in excess of 2000, and upon this basis as school-going, the average attendance would be about twenty per cent. This estimate is not, however, strictly fair, because but few children (in the country) enter school before the age of seven years, and fewer still attend school after the age of sixteen years. Making due allowance for those who do not attend school during the two periods indicated, it would be safe to assume twenty-five per cent. of average attendance (of those who ought to be at school) as approximately true. This would indicate irregular attendance; or more properly, non-attendance, and such is the case. School statistics in our own State, and in others, present and recognize this unwelcome fact. Absenteeism, from whatever causes proceeding, and there are many, has become a general and prevalent

disorder in schools, and no system of school hygiene yet adopted, has been entirely successful in eradicating it. We can at best hope to arrest its progress and give partial relief. To effect this, however, the propriety of a compulsory law, for which some contend, with fines and penalties, is not only questionable, but its enforcement would involve difficulties which few would dare encounter. It would be impossible to determine upon whom rests the fault or blame of non-attendance. If intended to reach the parent or patron, he would plead fault in the teacher, he in turn, fault in a system that failed to remunerate his services, and in fine, all school authorities or officers would come in for a share of abuse, and still the difficulty would remain of fixing the blame where it would properly belong. And it is certainly clear that poorly qualified teachers, with poor pay, if they do not tend to aggravate, will not impart much to the health and strength of the patient, for poor pay will neither make nor procure professionally trained and qualified teachers. Persons who have expended time, talent and money to acquire the qualifications requisite to fit them for the vocation of teaching, however honorable that vocation may be, and whatever reputation may be acquired in the pursuit, are not willing, like old Roman advocates, to work for honor alone. Honor and reputation are good and even desirable, but if any one fact is established beyond question or cavil, whether in the domain of religion, politics or letters, it is, that, in this nineteenth century, money is *one* of the indispensables. While institutes, associations, supervision and other agencies are essential, and exert great influence, yet the nearest approach to a specific for non-attendance is a good treasury; that will command professional skill and talent, will bring about emulation among teachers, emulation among teachers will produce competition among trustees, parents, &c., in search of the best services, and excite that degree of interest which is the surest sign of health and vigor in any system of public policy. We have thus given a summary of the condition of our schools, and while no great advance is shown, yet

the tone and sentiment of our people, under surrounding difficulties, towards our Public Schools and the patient industry of most of our teachers, with inadequate salaries, deserve favorable mention for what has been accomplished.

In conclusion, a brief reference to the Colored Schools of the county may be regarded as a legitimate item in our report. There are in the county thirteen Colored Schools, twelve of which have three Trustees, each, (colored) appointed by our School Board, upon the recommendation of the patrons of the respective schools. The taxes paid by the colored people, for school purposes, for a period of five years, amounts to one hundred and forty-four dollars and three cents. This amount divided among thirteen schools gives to each \$11.08, which has been paid to twelve schools as appears in financial statement of this report. The reason why no distribution has been made heretofore, is, because no competent authority to receipt for it, until recently, could be found.

The thirteenth school has, up to this date, refused recognition of any authority by our Board. Few, if any of the schools, are in operation, and the small amount of taxes raised by this class of our population, if applied to *one* school alone, would not suffice to run it six months. I am not prepared, from any data in my possession, to speak of their future prospects in regard to education. No agitation of the question has brought it prominently to public notice, and consequently no public expression of opinion has been elicited in any definite manner, whether the tactics of masterly inactivity shall continue to prevail, and the fight continue on that line till the consummation of all things, remains to be seen.

GEORGE M. LLOYD,

Secretary, &c.

DORCHESTER COUNTY.

JAMES L. BRYAN, *Secretary, Treasurer and Examiner.*

M. A. NEWELL, *President State Board of Education :*

To the members of the present Board of School Commissioners, this meeting will doubtless be a most interesting one. It will probably be the last one at which we will all assemble together as the School Board; and while it will be an occasion of more or less pain, on account of the severance of official relations, it must be gratifying to all as affording an opportunity of recalling years of labor, and hearty co-operation in the noble cause of education, undisturbed by a single unkind word or deed. It is rare that such continuous service by so large a number of gentlemen coming from all parts of a large county, representing somewhat different interests is performed without a jar or ruffle, and nothing speaks better for the high-toned character of the present Board than this simple fact.

The change to be made in the execution of the law, by the reduction of the number of members of the County Boards, together with the approaching meeting of the Legislature, will give more importance to the reports of this year, than to the former annual ones. It is important too, that a review of the working of the system since its inauguration should be at hand, so that the Legislature may act intelligently in any change they may make in the present admirable law. Allusion has been made elsewhere to the fact that of thirteen changes in the law of 1867, recommended by the Association of School Officers of Maryland, nine were adopted entire, two partially, and the others were unimportant. Due attention will no doubt be paid to any recommendation coming from the same source, and

it is only to co-operate with the entire body of School Officers of the State, that I venture upon a few suggestions now. In regard to reduction of the number of Commissioners, a great diversity of opinion, doubtless, exists throughout the State, as it certainly does in our own Board. This Board, numbering fourteen members, has experienced the advantages and disadvantages of a large number of Commissioners. The advantages are apparent, when a mere election district is under the exclusive care of an intelligent gentleman, selected for his fitness and residence, and special interest in the welfare of his own immediate neighborhood, opportunities of caring for a limited number of schools are within the power of a Commissioner, with such limited jurisdiction. It will be more laborious, though not impossible for three Commissioners to exercise the same care over the schools of the entire county. The more liberal allowance to the smaller Board will remove one of the difficulties, but we shall have to wait one year, at least, to see the result of the new arrangement. The *disadvantages* of a very large number of Commissioners have been too evident to detain us long in the discussion. Repeated meetings and failures of organization, on account of the number assembled, being less than that required to constitute a quorum—a full meeting too, oftentimes accomplishing little real work, in consequence of the tedious discussion, explanations and interruptions, incident to the working of so large a body. As far as office work and the supervision of the finances and other strictly business relations of the Board are concerned, the smaller number will prove to be more efficient one.

To any fair unprejudiced mind, the great advance made in the cause of Free Education from the condition, in which the law of 1865, found this county must be apparent, at that time, the schools numbered about *thirty*, and the pupils on the rolls could not possibly have numbered *fifteen hundred*. The present report shows that we have virtually *sixty-seven* schools for white children, with over 3,000 pupils

on the rolls, and nearly *twenty* schools for colored children, probably numbering seven or eight hundred more, making eighty schools and nearly 4,000 pupils. The condition of the houses in 1866, was most deplorable. Very few were in the hands of the School Commissioners, and still less were proper places for the education of our youth. Now we have about sixty houses, nearly all of which are secured to the Board of School Commissioners; *eighteen* new ones, the land deeded to the Board, and the entire property interest secured to the county at least \$15,000. In a majority of these schools, too, are appliances for teaching deemed utterly unnecessary by the old fogysm of the past. Intelligent, earnest-minded teachers, men and women, carefully examined before being set to work, fill the chairs formerly occupied oftentimes by mere drones. Bright boys and girls engaged in studies far in advance of the attainments of many who were deemed "*fit to teach school*" in those days, and still more encouraging sign, a general willingness on the part of the people to sustain the system, by sending the children to the schools, and by their readiness in furnishing means nearly four times as great as were deemed necessary in 1864. The regularity and system attending the whole work, too, is so very different from the spasmodic efforts of the friends of education, under the old system, when the districts were isolated and possessed no bond of Union. To one able, from his connection with the school system, to recall the condition of the schools in the past, and compare it with their present state, the change is so apparent and so gratifying, that he cannot withhold his gratitude to the good people of the county who have patiently waited on the work, assured that a better time would come to the noble band of co-laborers who have worked so faithfully, under reproach oftentimes, equally sure that the work would prove its own best recommendation in time; and lastly, to Almighty God, the fountain of all wisdom, who assists his creatures in their efforts to raise themselves higher and higher in the scale of intelligence,

that they may know Him better and better, and love Him more and more. We may be pardoned now for this enthusiasm, and might indulge still more in rejoicing, as we are assured that the vast majority of our people share the happiness. The day is past in this county, when any one could rally men in an attack upon the cause of Free Schools. The administrators of the system may err, and will have to give place to others of better judgment, but the cause itself is imbedded in the hearts of our people, and can have but one change from *good* to *better*, and from *better* to *best*.

The Board was compelled last year, in consequence of the accumulation of debt, incurred during the preceding years, to reduce the number of terms to three. Information of this action was given to the public through the newspapers, and we can now see the injury done the schools by such hard necessity. The number of pupils on the rolls is 3,024, but the number in attendance does not reach one-half of that amount. The proportion of attendants to those enrolled for a single term is about *two-thirds*. There can be no doubt that the limiting of the terms had a great deal to do with the poor attendance. After months of holiday, the first opening of the schools is always irregular, and the attendance is never equal to the number enrolled. Another long holiday near christmas operates in the same way, and near the end of the third term, when the schools are about to close, the attendance again falls off. This is particularly observable in a good fruit year, as the present one has been, children can make good wages picking strawberries and peaches, and few parents amongst the farmers can resist the temptation to lose the labor of children, when it brings in such rich returns, in money. In our last report (1870) the larger number of terms and greater length of time the schools were taught, produced greater regularity in the attendance of pupils, and the proportion of pupils present to the number enrolled was much larger. One good result of the change for the single year, is the better condition of

our finances. We close this report (September 30th,) with a balance on hand of \$172,36. I refer, at this point, to a school, in which the average has always been good, although the teacher is not superior to many in the county. In this case, tickets are given the children daily for *attendance*. When a certain number of these tickets is gained during the term, a cheap premium is given. The expense in this case falls upon the teacher. If some general system were adopted, and the expense considered a part of the school expenses, most favorable results would follow a very small outlay. The interest of the teacher should be excited by making his salary depend in part, upon the proportion of numbers enrolled to the number in the district entitled to tuition, and also the proportion of attendance to the enrollment. In addition to these direct appeals to the teacher and pupils, there should be some mode of interesting the parents. Weekly, monthly or quarterly reports would do good, and should be considered as necessary a part of the school management as text books, black boards, or wall maps. Here again, it is necessary for the Board to assume the cost, and as in the other case, the outlay would be amply repaid. The necessity of selling the school books has, no doubt, kept many pupils from the schools, although the really poor are furnished without charge. It will be a fortunate day for our schools when the books, as well as the tuition, are free to all. We have always furnished pens, ink, pencils, crayons, &c., freely to all, and nothing but our limited means has kept the Board from enlarging this free list.

There is no problem connected with the successful management of our schools of more importance, or one more difficult to solve than this one of attendance, as our report shows, the attendance of those enrolled is not satisfactory, and there still remains a large number of the young, who never enter the school room, and notwithstanding this state of the case, the very large number of schools in the county, rendered necessary by its great extent, will make

it necessary for those who assess the tax for this great interest, to give a larger amount than we have ever yet received, or the schools cannot be kept open for four terms, the number of schools increased, or the work be properly performed in these now established. The very large appropriation for building and repairing school houses (\$5.596,58) tells the tale of the condition of our school houses, even after six years of attention to this important department of school work. We could easily and most properly have expended double the amount, and still all the houses needed would not have been built. *Nine* have been erected, a large number repaired, and *three* are still under construction. The increasing expense of changing furniture, introducing blackboards, maps, &c., should always be considered in this connection, as the *live* teacher will demand better and better appointments for his school with every advance he makes in the art of teaching.

The re-examination of teachers, whose certificates had run three years, was most thorough, and the result most gratifying. Notwithstanding the severity of the trial, all of the old teachers who have applied have passed the re-examination with credit. This Board early determined to keep all its teachers up to a creditable standard, and in no case has a certificate been granted except after careful examination. Nor did we expect the teachers holding certificates to stop their own education, satisfied with the evidence of having once passed the ordeal of an examination. But by holding before them the certainty of even a more severe trial the second time, we have succeeded in securing a body of instructors that would do credit to any system, and have given special value to the "renewed" certificate.

The colored people of the county are gradually discovering the kind feelings of the Board for them, and from *six* schools under our care, we have now about *twenty*. The appropriation to these schools for the coming year will be considerably more than the entire amount of school taxes paid by the entire colored population of the county. The

difficulty of securing good teachers for these schools still continues. White teachers cannot be procured, and as the Board preferred to leave the selection to the parties most interested, the evil will most likely continue. The Trustees are, in all cases, colored men of the school districts, and in most cases, have no education whatever. They manifest the greatest interest in the education of their young, and some of the schools are most creditable to teachers and pupils.

The Examiner reserves for the last, his notice of the Institute, held in Cambridge, last December. Although many of the teachers were absent, yet enough were present to make the session a successful one. With Professor Newell to preside, and with the aid of Alex. Chaplain, Examiner, of Talbot county, and other friends of education, there could not fail to be a large amount of valuable instruction given. All who were present were encouraged and gratified. The public meeting in the Court House was largely attended, and gave great satisfaction to the community. The Board will never have cause to regret the allowance of a per diem of \$1.50 to each teacher in attendance, for never was money better expended.

JAMES L. BRYAN,
Secretary, Treasurer and Examiner.

Sale of Indian Lands, in part payment..... 342 00	Office Expenses and Ac- count Books..... 380 19
Amount from over pay of a teacher refunded.... 25 00	Paid to Colored Schools.. 457 00
	Institute Expenses..... 173 64
	Printing..... 60 25
	Balance on hand..... 172 36
<u>\$32,011 56</u>	<u>\$32,011 56</u>

From the above statement, it will be perceived that the expense of running the schools, including all expenses except the outlay for school houses, amounts to \$18,375.22, for if we take from \$32,011.56, the balance due \$6,886 09, \$5,596.58 for school houses, the balance now in hand \$172,36, and the amount on books \$981,31, we obtain \$18,375.22.

FREDERICK COUNTY.

DANIEL LAKIN, *President*.

JOHN W. PAGE, *Examiner*.

PROF. M. A. NEWELL,

DEAR SIR:—I have the honor to present the accompanying statistics of the Public Schools of Frederick county, for the year ending September 30, 1871.

They shew a gradual increase of all the material interests of our schools, and, I regret to say, a gradual decrease in the amount of State School Tax apportioned to this county. The field of our operations is very large, a thickly settled country, teeming with children of school age, (the large majority of our school houses, tho' built substantially, are of the old style, too small and lack capacity to accommodate conveniently, and without risk to health, all the children), and the demand is constantly and daily increasing for new districts, and new school houses. In view of these facts we are discouraged to find a decrease of State Tax. The school population of this county is about 18,000. We report a total attendance of not one-half of this number, notwithstanding the fact that there is scarcely a flourishing private subscription school in the county outside of Frederick city, still the whole number now being in attendance, during the year would shew an average to each school of 70 pupils, with perhaps an average attendance during the Fall, Winter and Spring terms of from 55 to 60, this attendance is greater than our capacity to accommodate properly. To accommodate all the school children of our county, would require double our present number of houses.

There are now 120 Public Schools in this county in successful operation, occupying 120 houses, 12 frame, 36 brick, 37 log, 36 stone. The number of principal teachers engaged during the past year were, male 92, female 45, assistant teachers, male 6, female 12, total 155.

These schools have been furnished with text books, stationery, &c., costing \$6,348 30, for use of which, book fees have been received amounting to \$6,795 96, being an excess over the cost of \$447 76.

Of school houses, 33 are inclosed, 101 have out-buildings, 74 have good furniture; schools were open 3 3-5 terms.

The Examiner paid 115 official visits.

During the past year the following additional school houses have been built, purchased or otherwise come into possession of the School Board :

Brick School House No. 4, Election District No. 4, purchased.						
Log	"	"	9,	"	"	5, donated and repaired.
Frame	"	"	7,	"	"	6, built.
Log	"	"	8,	"	"	6, built.
Frame	"	"	5,	"	"	9, built.
Brick (double)	"	"	5,	"	"	11, rented.
Frame	"	"	5,	"	"	8, built.
Log	"	"	8,	"	"	9, built.
Frame	"	"	3,	"	"	12, built.
Frame	"	"	4,	"	"	17, built.

Our teachers generally are very earnest in their work, and results follow. Our Teachers' Institute, held in the Court room of this city, during the second week in February, was a most gratifying success, to which you have abundantly testified. It resulted in great good to teachers, and through them to their several schools. It was a week well spent. I hope our teachers may continue to be instructed, and our people edified by at least one Institute every year.

In addition to the above reported schools, there are in this county seventeen colored schools, which are aided by appropriations made by our Board; these schools have an estimated attendance of from 500 to 600 pupils.

D. T. LAKIN, *President.*

JNO. W. PAGE, *Ex. Sec. and Treas.*

FREDERICK COUNTY—SUMMARY OF SCHOOL STATISTICS.

For Year ending September 30, 1871.

To amount of note in Central National Bank.....	\$6,000 00
* " " " Farmers and Mechanics Bank.....	5,000 00

* This note was paid at its maturity, Oct. 16, 1871.

HARFORD COUNTY.

PROF. M. A. NEWELL,

*Dear Sir :—*I have the honor to submit my report of the condition of our schools in this county.

I regret to say, that our financial difficulties still exist, owing to our County Commissioners refusing to levy the means to relieve our Board from indebtedness, accruing chiefly from building new school houses. Our Board asked for a levy of twenty-five cents, ten cents for building school houses, petitioned for by the people in different parts of the county, and fifteen cents to keep the schools open four terms.

Two of the Commissioners were willing to grant us what we asked, but three were inflexibly opposed. I respect the late Board personally as gentlemen, but officially as County Commissioners, they are no friends to the Public Schools. However, they are out of office, and their illiberality towards public school education will be little credit to them. I trust our new Board of County Commissioners will be more liberal, and grant our Board sufficient money to keep our schools open four terms, and pay our obligations. The amount granted to us last year by the County Commissioners, was ten cents in one dollar. Amount of levy \$12,714.29; for 1871 at ten cents, \$12,840.48. But this will not be sufficient to pay off our indebtedness and keep the schools open three terms. Our distribution of State Tax has been gradually diminishing. In 1869 the State School

Tax received was \$13,075.47; in 1870, \$11,937.21; a decrease of \$1,138.26. We expect a farther decrease for the ensuing year. The census of 1870 shows a decrease in the number of children in this county (between the age of five and twenty) as 1190, on the census of 1860. I am confident the census is not correct. It is therefore necessary that an increase in the county levy should be made for the maintenance of Public Schools. You will perceive that our Board are economical, and are anxious to improve the condition of the Public Schools of the county. There still exists an apathy on the part of many of the patrons, with regard to the education of their children. This apathy is clearly evinced in the irregular attendance of the pupils. Our teachers, as yet, do not receive sufficient compensation, but this arises more from want of sufficient funds than any unwillingness on the part of the Board, to grant an increase of salary. The Board have erected a new school house, No. 1, at Abington, 36 x 24, 12 feet ceiling; vestibule 8 x 6, at a cost of \$1,150. One at Harford Furnace, (No. 2, 1st district, same size, and at the same cost, \$1,150. One at Forest Hill, No. 7, 3rd district, of similar dimensions, cost including the lot and furniture, \$1,373.50. One at Calvary, cost \$850.00; one above the Hickory, cost, including furniture, \$1,100. A new school house, No. 20, in the 4th district, has also been erected at a cost of \$800. Two schools have been purchased from the owners; one in the 2d district, No. 12, for \$750, the other in the 3d district, Chapel School House, for \$500. School houses are still needed, and the patrons are still urging the Board to build and repair. I need say little about our Institute, held in Belair, July 31st. You witnessed the interest our teachers manifested in the exercises. We are greatly indebted to you and Dr. Kepler for your presence and efficient aid.

In my visits to the schools, I have endeavored to impress upon the teachers the importance of adopting the mode of classifying their pupils, suggested by you at the Institute,

and have found that the majority have classified their pupils as suggested.

There have been eighty-three white schools in operation during the past year. There have been five colored schools in operation during our last term, under the jurisdiction of the Board. The amount paid to the teachers is \$287.29. Five colored schools have been added to our list since the 1st of September. We will have ten colored schools under our charge. The Board fixed the salary of colored teachers at seventy dollars per term. The number of colored pupils reported on roll in the five colored schools, is 196, average 39. The five schools in Havre de Grace, or 6th district, which heretofore occupied small, contracted, ill-adapted and badly ventilated rooms, called school houses, have been consolidated into two at present, and transferred to the spacious and commodious rooms in the Town Hall. In the male department, under the charge of Mr. Tammissy, assisted by Mr. C. Wilson, there are 92 on the roll. In the female department, in charge of Miss Fletcher and Miss Barnes, there are 52 on roll. These rooms are more comfortable and better adapted for school rooms than any in the county. These schools have been graded. Commissioner Frieze intends to have his primary department in the Town School House, which has been painted and improved in appearance. This brick school house is a very comfortable one. I wish I could say as much of the school houses in the rural districts. I must not forget to mention the fine school house erected at Lapidam, by the exertion and energy of Dr. W. W. Virdin, Commissioner of the 2d district. It is certainly an ornament to Lapidam, it cost \$1,172. The Doctor manifests a great interest in educational matters, and exerts all his energies to improve the condition of the schools under his charge. Our District School Commissioners exhibit little interest generally in the schools under their charge.

Our schools are much better, and the teachers more efficient than they were prior to the present public school system; let grumbles assert to the contrary. This I know from personal knowledge. I trust our legislators will consider well before they make any radical changes in our present system.

Yours, &c.

ROBERT HENRY, *Secretary*.

HOWARD COUNTY.

A. G. WARFIELD, *President*.S. K. DASHIELL, *Secretary*.

PROF. M. A. NEWELL.

Dear Sir:—Another scholastic year has rolled around, and it has admonished me that my duty is to report to you the condition of the schools of Howard county;—a duty pleasant to me, especially as the management of the work confided to my care receives the approval of the School Board, the patrons, the teachers, the pupils, and I hope yourself, the chief of the educational system of the State.

The schools are under the same management of the School Board as last reported, each Commissioner managing, as then reported, and all have done their duty to make the schools pleasant, comfortable and successful so far as it was in their power to make them so. I greatly regret that two of our most accomplished teachers have left our county; Stephen A. Cremin, Esq., has been appointed to the assistant's position in Grammar School, No. 1, in the city of Baltimore, the other, Miss Olivia Dorsey, has left, but I am pleased that she desires to return, and I hope she will be appointed to some position in our county. Our work goes bravely on—our *financial* account is in a most healthy condition, enough to keep the schools in constant operation. Our Board since 1865, has managed the schools financially, well; we have had to borrow but once, an amount of money *for a few days* at the trivial expense of interest of \$3.09, and that was done so that we might say, we paid every teacher his salary *promptly at the end of each term*. *We do not owe a dollar*, and have never owed any outstanding claims, which are so pre-

judicial to the interest of the schools. We have applied our whole resources in chief to the salaries of teachers, and the purchase of books, and if anything went undone by the way of building and repairs, we had the good fortune to know that since 1865, not one cent has been paid by any teacher to my knowledge and belief, in discounting his salary—so often done to the great injury of the school interest, as well as curtailing the amount of the teachers' salaries. We are proud of this state of affairs. Our teachers work well, and I am proud that you have had an evidence personally of the interest of the patrons, and the advancement of the pupils in our county. I hope you remember your visit to the "long corner school," on the 22d June, when you had two hundred and fifty patrons at the school examination; and the pupils performed their part to your satisfaction, an evidence itself of their proficiency. If no other pay had been received by me, the pleasure on that occasion would have paid me for all my labor in a cause so dear to me.

I desire to call your attention to the statistical report of 1870, in reference to the number of pupils studying each branch of education. As the blanks of 1870 varied the report of 1869; those of 1870 are the *average* number, and those of 1869 are *not average*. *In truth*, both 1869 and 1870 are about equal, if made out in the same way. I hope that the inadvertence will not occur again. Our schools keep up their vigor, and I hope will not lose their *vim*, as the report of 1870 would indicate if left unexplained.

We asked through the School Board the levy of \$10,000, in May, 1871, but the County Commissioners gave us only \$9,000. This is paid quarterly on the days of our quarterly meetings, at the end of each term. Our resources are as indicated by the balance exhibit of receipts and disbursements; and our resources are confined to the quarterly payments by the State and the County Commissioners, which are about enough to pay our teachers and other expenses; and the balance on hand at the end of the year,

September 30th, is made up of the State fund, payable in July of each year; all of which is expended by the 30th of June, in each year, but replenished in July of each year, and keeps our finances in a healthy condition. But had we spent our money in building school houses, and other expenses, we would have been in a bad condition. I do not mean by this that we would not fancy new and well furnished school houses; but I do mean that we prefer to confine ourselves to the proper execution of the law, build when we can get the money from the County Commissioners; but at all events carry on our schools, and pay as we go. The exhibit of the book sales requires an explanation, the difference between the sale and the cost of books, is caused by the addition of the sale of *old* books, to the sale of *new* books. Our plan is to add about ten per cent. to the cost of books, &c., and furnish ink, pens and pencils gratuitously, to pay for this and for the freight. The ten per cent. covers this sum, and the pupils are paying about cost for their school supplies, each pupil who is able, pays for his own books, those not able, have their books furnished gratuitously, so that no child need have any excuse for not receiving an education.

I have not had an *Institute* this year, but I have arranged with the School Board to call one that I hope will be a credit to my county, my teachers, and our School Board. I believe our schools, will compare favorably in point of management or improvement, with any schools in the counties of the State. I have visited each school in the county, every quarter, and I have found the interest in the schools on the increase. The patrons and pupils are active, and in many instances the patrons encouraged the teachers by their presence at the school room, at the visits of the Examiner. I find the more frequently the patrons visit the schools, the more the pupils and teachers are encouraged—the better the work goes on. Patrons, visit the schools more, for the best schools are those that are visited by the patrons frequently! In my last report I alluded to

the apathy of the patrons of the school at Elysville, the manufacturing village, in which is situated No. 6, in district No. 2. I do not wish to be misunderstood in that reference. In *all* manufacturing villages in the county, the parents express by their actions too *much* eagerness to derive benefit from the labor of their small children, and too *little* desire for their mental culture. The smallness of the school at No. 6, brought forth my remark, not intending thereby to throw any blame upon the high toned owners of this factory and surroundings, who would do all in their power to build up a good school, and would prefer that the smaller children should go to school, for two reasons: the child would receive a benefit, and no loss would be occasioned by their absence from the factory. There is no money to the manufacturers from such labor; and one of the best instances of their appreciation of a school, is that they furnish a school house free of cost, *and have done so for years.*

I have given you as succinct a report as I deemed needful, but I cannot release myself from this report without saying that my teachers have done well during the year. My pupils have tried to do well, and have done well. I find the more agreeable the teacher makes the school room, agreeable by pleasant associations, the more the pupils learn. The pupils are as glad to see me as if I was a relative, and all this is occasioned because they know I endeavor to them a *life* in my labor—I labor for their good—and seeing the interest I have in the schools, and in their personal comfort, and improvement of the pupils, they try to please me, by study and improvement. I will, during life, look back on the schools of this county with pride and love. To the School Board and patrons of schools, and pupils, and the citizens of the county, I return my compliments for their kindness to me.

S. K. DASHIELL, *Examiner.*

KENT COUNTY.

J. C. TAYLOR, *President.*HOWARD MEEKS, *Sec. and Treas.*

The schools of Kent county are in excellent condition. The amount asked for by the County School Board for the support of Public Schools was twenty thousand dollars; the amount levied was sixteen thousand, forty-three dollars and fifty cents; in addition to which the County Commissioners appropriated directly nearly two thousand dollars, to aid in the construction of two first-class school-houses, one at Locust Grove and one at Still Pond. With the expenditure of this money, however, this Board had nothing to do.

Of the amount levied for the use of the Board, and of balances due from the preceding year, the sum of sixteen thousand and fifty-one dollars has been paid on orders issued by this Board, and the sum of seven hundred dollars paid in cash to the Treasurer of the Board, making in all seventeen thousand, seven hundred and fifty-one dollars. The Board has also given orders on the assessment of the current year to the amount of two thousand eight hundred and forty-four dollars and eighty-seven cents. Four new school houses have been built; one on Eastern Neck Island, a very neat and commodious structure, on land donated with characteristic liberality by Charles B. Mitchell, Esq., of Queens-town. One at Locust Grove, one at Still Pond, and one at Hopewel, near Chestertown. Two school-houses have been removed and rebuilt in more eligible and central points, one of them almost wholly at the expense of Thomas W. Ringgold, Esq., on land given by him.

A new house is now nearly completed near Urieville on lot of land generously given by Miss Susan E. Raymond of Smyrna, Del., and another now quite finished in Morgan's Creek Neck. A new house is also in course of construction near Betterton on the Sassafras river, and steps have been taken for the division of District No. 1, in the 1st election district, on the road from Millington to Smyrna, Del., and the erection of two new houses in lieu of the present one. The expense of these five last houses is to be defrayed out of the county levy of 1872, and they are mentioned here only because initiated by this Board.

In the month of April last a proposition was made by the heirs of William Morris to give to the School Board a legal title to a lot of land about one acre and one-half near the Delaware line and an unfinished church edifice thereon, provided the Board would finish the building and lay off a new school district with that as the centre. The matter was referred to a highly intelligent committee, one a member of the Board, who reported favorably, and the school was immediately organized in a private dwelling near until the necessary work could be done to the house. The school is now in successful operation on purely missionary ground, four only of the pupils having ever seen a school house before entering this, their own.

The new houses at Locust Grove and Still Pond are furnished with Uhlinger's patent desks, others with the primitive pattern of the last century. The hall over the school edifice at Galena has been furnished with comfortable settees and has been rented out.

The want of Hotel accommodations at Centreville, at which place, by a right of rotation, the Institute for this and Queen Anne's county should have been held, precluded our teachers from the benefits of their annual yearly meeting; and arrangements to hold it at Millington in Kent were made too late to secure the aid we needed. Our teachers were sorely disappointed. No effort has been made to re-organize the County Teachers' Association, be-

cause the facilities for reaching a central point are so meagre that teachers find it impossible to meet without incurring heavier expense than they are able to bear. By means, however, of subscriptions to the South Atlantic Magazine, they have been able to secure the larger portion of the teachers' library, published by A. S. Barnes & Co., thus forming the nucleus of what may prove a valuable adjunct to their labors. By a judicious arrangement with the University Publishing Company an entire stock of new books—spellers, readers, arithmetics and geographies—has been placed in the schools, every pupil being supplied with whatever books needed at no cost either to parents or the Board, other than the old books of like kind and freight thereon to Baltimore. The value of these books is about three thousand dollars. The item for books in the financial statement was chiefly for indebtedness of former years.

An effort was made to establish a High School for the 3d and 5th election districts, to which this Board applies \$480, hoping by private effort to make it permanent. But private aid was not adequately given, and the School will have to be discontinued until more auspicious circumstances shall occur. The house and grounds for the use of the High School was given by J. C. Taylor, Esq., free of cost.

J. C. TAYLOR, *President.*

HOWARD MEEKS,

Secretary and Treasurer.

QUEEN ANNE'S COUNTY.

HON. R. L. Wall maps,, *Pres.*

JAS. W. THOMPSON, *Sec., &c.*

PROF. M. A. NEWELL,

Dear Sir:—I send you the annual report of the Board of School Commissioners, of Queen Anne's county, for the year ending September 30, 1871.

We closed the year, as you will see, with a small balance in our favor, though we had devoted a considerable portion of our year's funds, as in former years, to building and repairs, and though the people have to furnish the money, there is scarcely ever a meeting of our Board, at which petitions are not presented, numerously signed, (and many of the signers are tax payers,) for still further expenditures for the same purpose. If our Board had the means, they might increase the number of our schools to great public advantage. They only spend as they have the money, and thus keep themselves unembarrassed. It is unnecessary for me to repeat here any information that you can obtain from the statistical report, but that you may not draw an unfavorable conclusion from it, I must say, that our averages, which seem to be less than they were last year, are in reality larger, and that the difference is caused by the different manner in which they are made, in accordance with directions received in the blank reports issued by the State Board.

We have made a number of changes in our corps of teachers, and I have strong hopes that the changes will be beneficial. We have been fortunate in securing the services of some four or five of the graduates of the State Normal School, and though they have been with us only a few weeks, we have received the most gratifying accounts of them, both from patrons and Trustees.

Our schools were open during the whole of the school year, and we have the means secured to keep them in operation during the whole of the current year. At the close of the last year, I reported that we were advancing, and I report now that we are by no means stationary, and are not at all disposed to fail of success. No energy can prevent failure.

Very truly yours, &c.

JAS. W. THOMPSON, *Sect. &c.*

ST. MARY'S COUNTY.

PROF. M. A. NEWELL,

Sir :—I herewith respectfully present my annual report, which I have aimed to conform to the requirements of your recent circular.

It shows that a larger number of pupils have attended our schools this year than at any time before, which is the more gratifying, as during the year there has been an unusual amount of sickness in the county. The condition of our schools is also good, especially in view of our financial embarrassments, which were such as to make an efficient administration almost impossible.

On the 31st day of December, 1869, the close of the administrative term of the previous Board, there existed a collective debt of \$5,115.21, and no funds in treasury to meet it. Of this sum \$3,811.16, was for teachers' salaries, on the Summer and Fall terms of that year. To the teachers the Board issued interest-bearing certificates of indebtedness, payable when levied by the county and collected. A requisition was then made upon the County Commissioners, for a levy for the sum of \$8,000, that amount being necessary to pay off the above indebtedness, and enable the Board to work the schools during the then current year, according to the requirements of the school law. But the Board of County Commissioners, in view of the pecuniary condition of our people, restricted the levy for

school purposes to the accrued debt of the Board, which, as stated above, was \$5,115.21.

Of this levy, made in May, 1870, there has been paid up to September 30, 1871, by the County Collectors, into the School Treasury, in returned teachers' certificates and cash, the sum of \$3,413.43, leaving a balance due treasury of \$1,701.78.

The restriction of the levy to *accrued* debt continued the embarrassment of the treasury throughout the year 1870, so that at its close the Board was again compelled to call for a county levy, for the sum of \$4,039, to meet its liabilities, and make some repairs upon school houses, asked for by their respective District Commissioners, and sanctioned by the Board. This last levy cannot be realized before January, 1872.

There was a Teachers' Association formed in this county about two years ago, but up to this time there has been no effort made to hold a Teachers' Institute. I have always been anxious to have one, but delayed from fear of failure. Several times I consulted with some of our teachers and influential citizens, as to the wisdom of attempting one, and the opinion of all was that the time had not yet come. While some of the reasons for this opinion still remain, such as inconvenience of distance of any assigned place of meeting from several parts of the county, others, and perhaps the stronger have disappeared, and now I see no formidable difficulty in the way of holding a successful Teachers' Institute in this county. I have been expecting to hold one this Fall, in common with Charles county, and shall arrange accordingly if notified of intention and time of holding it.

I am truly glad that St. Mary's county is at last represented in the Normal School. I hope the four students she has there will acquit themselves with honor, and upon their return to us, exemplify the excellence of their Normal training. The Normal School is attracting to itself increasing attention. Its reputation in respect to organiza-

tion and efficiency of administration, is very high and spreading. Teachers and people, when speaking of the school system, refer to the Normal School in such way as shows its familiarity with their thoughts, and strong hold upon their favor. The several visits I have made to it, have impressed me with the idea that it is all that an institution of the kind can possibly be, and that it is indispensable to the educational interests of the State.

I bear testimony to the fidelity of the present Board of School Commissioners to their duties, which have been trying and arduous in the embarrassed condition of the treasury. To myself, the secretarial and financial duties have been onerous, and I look forward to the expiration of my term with very sincere satisfaction.

With great respect, I am, yours,

JAMES BUNTING.

SOMERSET COUNTY.

 JEPHTHA HAYMAN, *President*.

 W. E. JONES, *Secretary*.

PROF. M. A. NEWELL,

President Board State School Commissioners :

*Dear Sir :—*I have the honor herewith to transmit to you a report of the condition of the Public Schools of Somerset county, for the year ending July 30, 1871, and of receipts and disbursements, for the fiscal year ending September 30, 1871, trusting in the hope that it will meet your approval.

The schools of the county have been kept open four terms, and are constantly receiving more and more of the confidence and support of the public, as is attested by the increase of pupils and average daily attendance. Nearly all classes of the people of this county are looking to the Public Schools for the elementary training and education of their children. The schools of the county for the past year have been controlled and directed by the Commissioners in a manner to elicit the approbation of all, and during the excitement of a heated political canvass, when the passions and prejudices of the people were aroused, I have yet to hear of the first charge of malfeasance in office, or that they were false to the interests of the Public Schools of the county. Since the close of the scholastic year, arrangements have been made to put several new schools into operation. The salaries of teachers have been increased to eighty dollars per term, and, in my opinion, the interests of the schools would be better subserved by a still greater

increase of salaries. I believe that most of our teachers will compare favorably with the teachers in the rural districts of other counties; yet many of them fall far short of having those qualifications necessary to that proficiency on the part of the pupils which is attainable, and which is seldom secured, except by those who have received a Normal School training. I have frequently urged upon parents the duty of sending their children to the Normal School, St. John's College, and other institutions, where there were vacancies, but with only partial success; but, I am informed, however, that two more estimable young ladies who are now teaching, are likely to go this month. In some instances, blanks have not been filled in the report, because the buildings were private property, and no longer used. That the aggregate costs of repairs do not agree with the costs of repairs in the column opposite the schools, arises from the fact that money has been paid to the Commissioners, for the purpose of repairs, but a statement showing where applied has not yet been received. The School Board last year asked the County Commissioners for a levy of ten cents on the \$100 they levied five cents, which gave us only \$1,818.32. After the School Board had taken legal steps to recover the balance, they gave us an order on Wicomico county, (which has been accepted,) for the amount claimed, \$1,818.32, payment of which is promised in the early part of the coming year. This year they levied all we asked, which was ten cents on the \$100, assessments, giving us \$ It will be seen by the report that we are now out of debt, the first time for a number of years. We will now be able to pay the salaries of teachers as they become due, and to supply those wants of furniture, maps, &c., which have been disregarded heretofore, because of the determination to be once again free from financial embarrassment.

In closing this report, I am unwilling to do the most of the teachers injustice, by withholding my testimony to the fact that they have discharged their arduous duties faith-

fully, as is evidenced by the advancement of the children, and the satisfaction of the parents; and while we view with pleasure the present status of the schools, and their future flattering prospects, we must express the regret that in some districts the teachers have not received that encouragement and co-operation from parents and others, which it is their duty and interest to extend.

Very truly yours,

W. E. JONES.

TALBOT COUNTY.

PROF. M. A. NEWELL,

President Board of State School Commissioners :

Sir :—I have the honor to transmit herewith, to the Board of State School Commissioners, the report of the Board of County School Commissioners of Talbot county, for the scholastic year ending July 15, 1871, and the fiscal year ending September 30, 1871.

The year has been, I think, on the part of both school officers and teachers, one of intelligent and well directed labor. Being constantly taught by experience, we are all the while becoming more efficient, and a permanent advancement is clearly discernible. The members of the School Board have done everything for the schools that labor and vigilance could accomplish with the means at hand; but the obstacles in the way of improvement are still numerous and formidable. A large number of our school houses are wholly unfit for school purposes. Of these, many are badly located, some are too small, and illy furnished to accommodate the pupils with any degree of comfort, and others are sufficiently dilapidated to be abandoned, if possible, at once. Another obstacle, to which I wish to call attention, is the want of teaching ability on the part of many, if not a majority of our teachers. I am convinced that the office of teacher can never be made really professional and remunerative so long as we continue to encourage and employ persons who are tempted to teach as a mere resource when they have failed in other pursuits. The great demand of the times is for trained teachers,

whose natural aptitudes have been thoroughly tested by competent instructors, either in Normal Schools or Normal Institutes. I do not think that there can be, in any given year, one-fourth enough teachers graduated from the State Normal School to supply the demands of our schools. There is a limit beyond which this institution can not be made to pass, and after this boundary line is touched all beyond must be supplied, if at all, by Normal Institutes. The Institute held in our county in July last was a success in its way. The introduction of model classes was an entirely new idea, and enabled us to give specific directions to teachers. Teachers were present from three other counties, and from an adjoining State. The discussions were instructive and practical, greater outside interest was manifested than ever before, and our court room was too small to hold the crowd of spectators that gave us, from day to day, the encouragement of their presence. But still we could not help feeling that our Institutes are not accomplishing all that they should. These Normal Institutes should be organized as temporary schools for teachers, and should remain in session for not less than three or four weeks of the vacation. Their work should be better defined, and they should be so conducted as to enable the superintendents to impart a higher degree of professional instruction to the teachers.

In my last report I alluded to the subject of grading and re-organizing our schools. This work has been successfully accomplished during the year. Our schools are now designated as Consolidated, Primary, Grammar and High Schools. The number of classes in the schools of different grades is limited; and by means of tickets of transfer, pupils who move from one school district to another, are placed precisely where they belong, without any preliminary examination. Every school of each grade is composed of the same number of parts or classes, and each class, by following the curriculum of study, accomplishes just so much in a given time. Thus we have a compact, closely

connected organism. Purpose and direction is given to the system, and it works as a harmonious whole. By our system of grading, and by establishing a curriculum of study, we have reduced the number of classes in all of our schools. In this way we have secured better teaching, by increasing the time that can be devoted to each class. If it were practicable to re-organize and grade the schools of every county upon the same plan, and to establish a uniform curriculum for the whole State, I think that the system would be endowed with new life and power. This subject should engage the attention of your Board. Want of space alone, deters me from giving the plan of organization and curriculum adopted by our Board for the Public Schools of our county.

Notwithstanding the additional labor incident to re-organizing our schools which had to be performed, I made twenty-six official visits more than I made last year. I am not at all satisfied, however, with my performances in this direction. In order to make a school system strong and efficient, and to keep up the interest of teachers, pupils and parents, the central authority should not only be vigilant, but also constant and minute in examining into the details and spirit of every school.

For the Board,

A. CHAPLAIN,

Secretary and Examiner.

TALBOT COUNTY.—SUMMARY OF SCHOOL STATISTICS.

WASHINGTON COUNTY.

PROF. M. A. NEWELL,

Dear Sir:—I have the honor to submit the annual report of the condition of the Public Schools of Washington county, for the year ending September 30, 1871.

I think it will be seen, from the accompanying statistics, that the schools generally are in good condition. The number of pupils on the roll has increased considerably, and the average attendance was at least fifty per cent. better than during the previous year. The number of schools has increased from 130 in 1870, to 142 in 1871, including in the latter number six colored schools.

Among the items of expenditure will be found the sum of \$4,640 for books. This expense was incurred by the introduction of new books into all our schools, so that now we have perfect uniformity in this respect throughout our county. The books introduced are Brook's Arithmetics, Fewsmith's Grammar, McGuffey's Speller and Reader, Creery's Speller, and Cornell's Geographies. The Board erected during the past year two new houses, and put an additional story upon a third, at an aggregate cost of near five thousand dollars, and the additional amount charged to new buildings in this report, is made up of claims for buildings, which had been erected previous to my last yearly financial statement, but which had not been paid for. We have now in process of erection two new buildings, which it is expected will be completed by the first of January next.

The incessant demands that have been made upon the

Board during the past two or three years for new houses, have induced them to expend an amount for that purpose far beyond the funds in hand, in consequence of which an indebtedness has been incurred, which has embarrassed the treasury during the past year, and will continue to do so for a year or two to come.

Another cause of financial embarrassment, during the past year, was the irregularity with which the county school taxes were paid over to the Treasurer of the Board. Indeed, there now remains of the levy of 1870, the sum of five thousand dollars unpaid, and reported by the County Treasurer to be uncollected. The first quarterly installment of the present levy has, however, been promptly paid, and I apprehend less trouble from this source in the future. Graded schools have been established throughout the county wherever there was a sufficient number of children in a school district. These schools, wherever established, have been decidedly successful, and command, in a high degree, the confidence and approbation of the people. The County Institute, held in September, was largely attended, and has, I believe, resulted in permanent good, and I take occasion here to thank you, sir, in behalf of the teachers and school authorities of this county, for your earnest co-operation, and very efficient labors on that occasion.

District Institutes have been organized in almost every Election District, and, wherever the local school authorities have not discouraged them, have been largely attended, and conducted with spirit. I regret to say, however, that in a number of instances, the school district Boards have forbidden their teachers to attend these meetings, and I fear the result will be an entire abandonment of any efforts to continue them.

We have begun the new year under favorable auspices, and I anticipate the same general success which I think has marked the career of our schools for a number of years past.

Our Board have made full provision for the support of the colored schools of our county. We had six of these

schools in operation during the last year, and expect to report a larger number for the year just commenced. We pay each colored school two dollars and fifty cents per term for each average scholar up to twenty, and one dollar per term for each average pupil above twenty. Some of these schools are largely attended and are believed to be doing good work for a class of people who have not heretofore had the opportunity to share so fully in the provisions made for general education.

All of which is respectfully submitted,

P. A. WITMER, *Secretary.*

WICOMICO COUNTY.

PROF. M. A. NEWELL,

President of the State Board of Education :

Again it is my duty to report to you the financial condition of the Public Schools of Wicomico county, for the year terminating the 30th of September inst.

One year has elapsed since my first report, and I feel profoundly grateful to the Giver of all our privileges, that I am permitted to engage in a similar office. The growth of the Public School Institution in this county will not allow me to begin where I left off a year ago, but am compelled to review the preceding statistics, and make up a rehash of the whole, without adverting to a general advancement. The most prominent improvement to be noticed, is the attendance of the pupils, which, I am pleased to discover, has increased considerably during the last scholastic year, especially in the first three terms, attributable, as I conceive, to the public interest, growing more in favor with the institution, regarding it as being permanent, and no longer an experiment being practiced by the educators of this State.

During the present school year, we have completed the erection of three modern school houses, at a cost of about four hundred dollars each, and now have in a process of erection three more, which will be completed by the beginning of the Spring term. There are many more needed in the county, but our limited means will not enable us to build them during this school year. The continual diminution of the State tax, and the indisposition on the part of

the County Commissioners to make up deficiencies, or even approximate them, render it impossible for the School Board to make any reliable calculation as to what they can do, or what they will do. Although this report will show a better financial standing than the preceding one, yet it must be stated that the teachers, and all concerned in the performance of the duties assigned them in the law, have undergone many privations and sacrifices to bring about such a result. The growth of the institution requires more means to support it. But it appears that our County Commissioners have not seen the expediency of such a contribution on their part, and cling with a tenacious pride to the arbitrary provision of the law, in not exceeding a tax of 10 per cent. on the taxable property of the county, whether it be sufficient or insufficient to meet the requisitions of the School Board. To illustrate this is but to refer to the minutes of the Board, calling upon them for a levy of \$6,000, for the present year, their action in the matter was a levy of \$4,000, plainly showing their unwillingness to respond to our appeals, although presented to them in a glaring and unmistakeable manner. In needs no minute investigations of our operations in order to discover the drawbacks encountered in that which we have accomplished. Our schools have been kept open the whole school year, but the Board has suspended them for the Fall term of the incoming year, that they at the close of their official services, might bring the finances nearer a par basis, which will accordingly appear from statistics appended.

A Teachers' Institute was held in the month of July, in the town of Salisbury, lasting four days, which was not attended by the teachers, I am sorry to say, as generally as I should have desired. To apologize for their absence, would be to screen them from a duty they incurred by becoming teachers, and required its fulfillment as much so as the performance of any other. However, I have the satisfaction of knowing that those who did attend were much

benefited, and the evidences of the same are manifested in the mode and manner of imparting instruction, closing the book as it were, and teaching orally. I am of the opinion that there is no better method of making competent and thorough teachers connected with this institution, than that recommended in the holding of Teachers' Institutes.

In closing my remarks, I refer you to the general statistics, embracing the operations of the white schools, and six colored ones. The colored schools were inaugurated during the Spring and Summer terms, which we hope is but the beginning of a better destiny for their race. A full exhibit of the same this report contains. We still continue the use of McGuffey's Readers, Cornell's Geographies, Smiths and Quackenbos' English Grammars, Blackburn's and McDonald's School History, and Davies' Series of Mathematics, such as are suited to Primary Schools, together with other branches, philosophy and rhetoric, which have not been much taught. Affixed to my report, is a statement of assets and liabilities for the present. The October appropriation has been received, and applied in liquidation of the same, showing a prospective balancing of accounts, in the beginning of the next school year.

All of which we most respectfully submit,

JNO. W. DOUGHERTY,
Secretary.

JAS. GILLIS,
President.

WORCESTER COUNTY.

WM. J. AYDELOTT, *President.*

IRVING SPENCE, *Examiner.*

PROF. M. A. NEWELL,

Dear Sir: I herewith submit my report for the year ending September 30, 1871. The number of pupils in our schools does not equal that of the previous year; this would seem to indicate some fault in the county work, or else that our present Public School system is unpopular. Our Board is composed of the sterling men of the county, and have elicited—which they fully merit—the commendation of our citizens for fidelity and energy. The system is growing in favor with this community, and there is the current opinion that the instruction, at public expense, of the children of the State is a necessity, and the system either in its present or modified form must be a permanent institution.

We have changed the mode of grading salaries; and to this I attribute in a great degree the diminished number of pupils. I believe, however, that our Board acted judiciously in adopting this mode, and that it is, under the circumstances, the best for us.

A second grade teacher, whose school averages ten pupils, receives the same salary as if the average were thirty per term. Formerly, for each pupil over fifteen as average there was an addition of one dollar to the salary.

The natural consequence of this is that some teachers are indifferent as to the number of pupils in attendance,

only so that they may report the average sufficient to secure the salary. Yet I must say that our teachers, generally, are interested in their work, and are doing it well.

Our three High Schools have been in successful operation, and I think will now merit the encomium you have before passed upon them.

We have five schools in the county organized for the education of colored children. These schools are not open more than one-half of the year. I wish it were, they could be properly encouraged and sustained; but there are difficulties attending their present condition which embarrass effort on the part of both races. There are difficulties in regard to the means to support these schools, obtaining suitable teachers, and the attendance of children.

These schools are under the general supervision of our county Board, and the particular direction of district School Commissioners (colored) appointed by that Board; and there exists perfect harmony between these authorities.

I most earnestly hope that some legislation will be adopted to place these schools upon a proper and permanent basis.

Respectfully,

IRVING SPENCE.
